Beyond Telemetry Wireless Sensors and Mapping

Automate Your Reporting With a Wireless Smart System!

Ensure Freshness, Enhance Customer Experience, and Simplify Management

Imagine a grocery store where every cooler, walk-in storage, and freezer is monitored wirelessly, ensuring optimal temperature tracking and alerts 24/7. Our state-of-the-art system provides real-time alerts for low and high temperatures, protecting your inventory and ensuring the freshest products for your customers.

A Beyond Telemetry system also captures customer satisfaction responses at key interaction points like the deli, restrooms, and customer service, giving you invaluable insights to improve service and customer loyalty.

- **Protect Your Inventory:** Receive alerts on your mobile device and view icon notifications displayed on the in-store managers tablet, for any temperature fluctuations, preventing spoilage and waste.
- **Boost Customer Satisfaction:** Monitor and respond to feedback from customer interaction points, ensuring a superior shopping experience.
- **Streamline Operations:** Wireless technology means easy installation with no complex wiring. Monitor all systems from a single, user-friendly interface.
- **Stay Compliant:** Meet all health and safety regulations with precise, reliable temperature tracking and documentation.

By investing in a Beyond Telemetry wireless monitoring system, you're not just buying technology, you're investing in peace of mind, customer happiness, and operational efficiency. Stay ahead of the competition and keep your store running smoothly with our comprehensive solution.

Let's do the Math!

Florida's minimum wage is \$12.00 per hour.

Documenting cooler temperatures for 60 coolers takes 120 minutes per round or \$24.00.

With three rounds daily, this results in a daily cost of \$72.00

Annually, this task takes 2,190 hours and costs \$26,280.00
