BELT DRIVES

The Future is Chainless

## WE LOVE SIMPLICITY

We are driven by our quest to make life simpler.

At Midnight, we have put together an experienced team with 30+ years of Bicycle Assembly, CNC Machining and Material Know-How under its belt (yes, pun intended).

With thousands of happy riders, Midnight Belt Drives allow you to focus on what matters the most: enjoying your ride.

## Clean

No Oil, Grease and Virtually Maintenance Free, So That You Can Focus on Your Ride

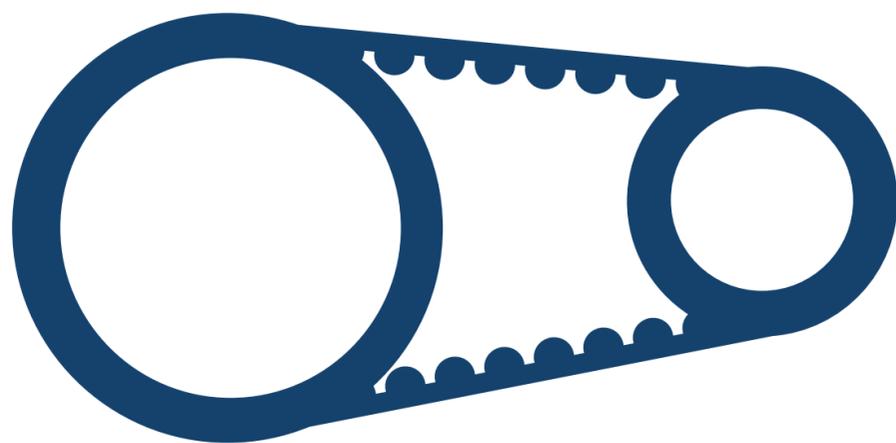

## Powerful

From Mid-Motor High Torque to Mountain Bikes, MCD Carbon Belt Drives Withstand Every Test

## Cost-Effective

Save on Every Mile. The More You Ride, the More You Save over Chain Systems

## MIDNIGHT BELT DRIVE: BELT UP YOUR BIKE

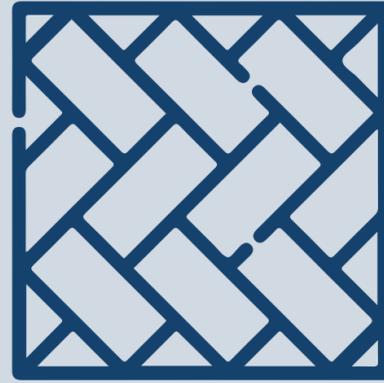

Midnight Belt Drives offer the most advanced technology and design, combining the strength of carbon fiber materials with the flexibility of rubber composites.

Designed to endure every type of terrain and weather, Midnight Drives are used on thousands of bicycles, e-bikes, and motorcycles worldwide.

## High Strength Synthetic Layer

Durability and resistance to impact

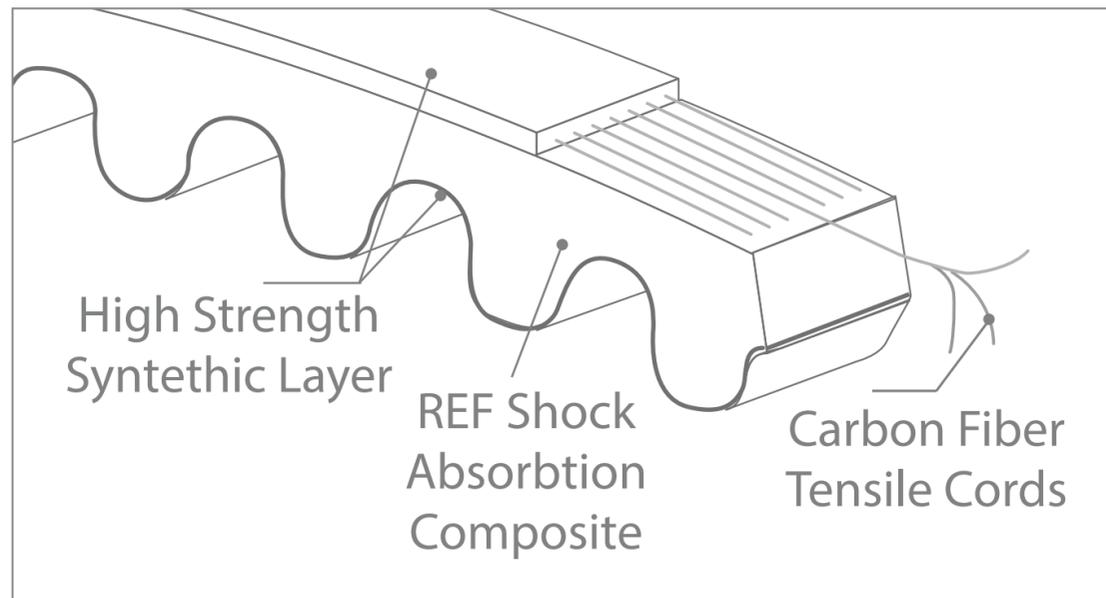

## REF Shock Absorbption Composite

High strength and high resistance to elongation

## Carbon Fiber Tensile Cords

Resistant to dust, UV light, and water

MIDNIGHT BELT DRIVES ARE  
MADE TO LAST

Average Durability  
Over 20,000 km

Tensile Strength  
Over 16,000 N/mm

# Bicycles

## DESIGNED TO LAST

Durable and virtually maintenance free, the Midnight Belt Drives series for Bicycles is designed to endure every type of terrain

## UNIQUE DESIGN

Midnight Belt Drives offer the most advanced technology and design, combining the strength of carbon fiber materials with the flexibility of rubber composites.

# E-Bikes

## SEAMLESS RIDES

One of the most advanced belt drive solutions in the market. Designed for e-bikes and pedelecs, it allows for a powerful and efficient performance in every weather and terrain.

## FOR EVERY MOTOR

Whether you are using an Electric Bike with a Mid-Motor or a Hub Motor, the MBD-E series is designed for city-based work commutes as well as high torque requirements of cargo bikes.
