A list of better ways to say "Thank You" to healthcare providers:

1. Don't call us "Hero." It is dehumanizing empathy manipulation. We are humans who deserve safe work conditions and advocacy.
2. Raise awareness for the Pro Act. Healthcare is now a business run without regard for human life. Front line workers are at the mercy of capitalism.
3. Make the Nurse Staffing Standards for Hospital Patient Safety & Quality of Care Act (May 2021) THE TOP PRIORITY of Congress!!
4. Mandate hospitals fit Healthcare Staff with REUSABLE P100 respirators pending the next inevitable outbreak/epidemic/pandemic. "Wasn't prepared," is not a valid explanation.
5. Student Loan forgiveness to Healthcare workers serving in the pandemic.
6. A fund to support families of healthcare workers who died during the pandemic. They gave everything to a country that allowed hospitals to send them to the front lines unprotected.

From:

Rep Tanner,

As a Nurse I would like to help you with your knowledge deficit and request that you advocate for health care providers by assisting in the swift passing of the Nurse Staffing Standards for Hospital Patient Safety and Quality of Care Act (expected May 2021). Staffing is truly more of a threat to patient safety than people realize. Hear my story:
