About the app.
Cloud Catcher
The most elusive prey can now be caught. In conjuntion with our tracking app. You can capture all but the most tricky clouds. Our app can show the migrationi patterns of the clouds. Popular feeding sites, as well as common sky broods. We also offer information based on each species of the clouds. Our aim is to help educate sky hunters capture their prey in the safest way possible. We can only hope that through our efforts we can finally bring an end to the clouds.

Make sure to travel light and fast in order to
capture your prey. The clouds are an arrogant
clan. They flaunt their supiriority always above
us. They look down upon us, but their
cocksure attitde will be their undoing. Our
app is to help knock the clouds off their high
horse. It was only a matter of time.

Finally I can track the clouds!

★★★★☆
Cloud locator needs improvement.

★★★☆☆
So whats the point of this app? I mean i havn't been able to capture any clouds. When I ask support on how I aquire my clouds, they offer no additional advice. Saying things like "Try freezeing the cloud and insert the solid cloud in a container". Well duh, I'm not an ammiture. I've been hunting

★★★★★
Its pretty good.
