

DENTAL SEDATION SOLUTIONS

Inhalation sedation for children

What is inhalation sedation?

We focus on providing **child-friendly, pain-free** dental treatments using **safe** sedation techniques and **modern dental techniques** trusted by families across the North West. One of the most effective methods we use is inhalation sedation, a **gentle and reliable** way to help children feel **calm and comfortable** during their dental care. A small nose mask delivers a carefully controlled mix of nitrous oxide and oxygen, often known as **"happy air"**, which helps children **relax** while remaining awake and able to communicate. This approach is widely used in paediatric dentistry to **reduce anxiety** and create a **positive, reassuring experience** for young patients. At Dental Sedation Solutions, we're proud to offer this gentle technique to make every child's visit a relaxed, **positive experience**.

What are the benefits?

Safe and child friendly

- Suitable for children aged 5+
- Safe and minimally invasive
- No needles required
- No long-lasting effects
- Scented air masks

Comfortable and convenient

- Short appointments (30-60 minutes)
- Quick to take effect and fast recovery
- Minimises discomfort

Reduces anxiety

- Children remain fully conscious throughout
- Eases anxiety and fear of treatment
- Improves cooperation during treatment
- Promotes relaxation and reduces pain

Dr Shilpa is a strong advocate of pain-free dentistry. That's why we use The Wand® STA system – a computerised method for delivering local anaesthetic with exceptional comfort and precision.

Meet Dr Shilpa Shah

Sedation Dentistry at Victoria Dental Clinic,
Manchester

At Dental Sedation Solutions, led by Dr Shilpa Shah, our goal is simple, to make dental visits easier and more comfortable for children.

We know the dental chair can sometimes feel a little scary, so we offer safe, child-friendly sedation to help turn nervous visits into calm, positive experiences.

What Parents Say

We are blown away with the excellent treatment my little girl has received! Shilpa is beyond excellent. She was able to save my daughter's teeth by filling them using 'happy air' sedation. My daughter was totally at ease and smiling. Thank goodness we found this wonderful pediatric dentist. We can't thank you enough!
