RE: Construction at 1815 Ridge Ave.

Dear 1815 Ridge Neighbors,

Please be advised that the construction project at 1815 Ridge will be erecting a tower crane on Monday, June 22nd and 23rd. The crane will be erected on the west side of the site along Ridge Ave. The crane's construction operation will be limited to the property. For safety reasons the crane is designed to weathervane with the wind. Please do not be alarmed if the crane appears to be over the top of your building it will move safely with the wind and never impact your property. The location has been reviewed and approved by the City of Evanston and the structural integrity has been designed and reviewed by professional structural engineers to ensure the safety of all.

We appreciate your patience while we work to complete our project and hope that during our time as visitors in your neighborhood you find us to be a good neighbor.
