

EYELASH / EYEBROW TINTING AFTERCARE

Thank you for choosing Natural Beauté.

To help achieve the best possible results from your tint treatment, please follow the advice below.

Aftercare

For the first 24 hours following your treatment:

- Avoid rubbing or touching the treated area.
- Avoid eye make-up for at least 12 hours.
- Avoid oil-based cleansers and skincare products around the treated area.
- Avoid hot baths, showers, saunas, steam rooms and swimming pools.
- Keep the treated area as dry as possible.

Important Information

A slight sensitivity or redness may occasionally occur following treatment.

If irritation develops, apply a cool compress to the area. If symptoms persist, worsen, or you have any concerns, seek medical advice.

If tint enters the eyes, rinse thoroughly with clean water.

Before Your Next Appointment

A patch test may be required if:

- You have not had this treatment with us before.
- It has been more than 3 months since your last treatment.
- Your medical history, medication, or health circumstances have changed.
