Team, please see below. NYSERDA says that "Solar and heat pumps go together like peanut butter and jelly." I have to agree... we did this in 2009 and we've been living this journey.

I hope NYSERDA will soon say that "Solar and EVs go together like peanut butter and jelly," because that is working very well for us as well (a plug-in hybrid for now, an EV to come as soon as Croton100 is launched!).

By the way, we should consider an electronic bulletin board or slack channel to share such news items so as not to clog up e-mail inboxes. Lisa, maybe your digitally savvy friend can set this up for us...

Best,

Chandu.
