

## Apex Engineering & Machine

ADAPTIVE SOLUTIONS FOR A  
COMPLEX WORLD

### About Us

Apex E&M provides answers to difficult technical problems. Our diverse team of engineers, operators, project managers, turnaround managers, and field specialists has decades of experience. Our people are the foundation of our success in delivering innovative, reliable, cost-effective solutions to our clients. We are a growing company with the knowledge and agility to successfully deliver on the challenges of today while preparing for the changing landscape of tomorrow.

### Our Philosophy

Communication is the cornerstone of success. Working openly as an integrated team keeps objectives in clear focus and reduces inefficiency, waste, and rework.

### Our Mission

To provide engineering solutions that have a positive lasting local and global impact.

### Our Services

Project Management

Process & CFD Modeling

Commissioning & Startup

Procedures & Training

# A Closer Look at What We Do

## Project Management

From major projects to smaller portfolios, our team has experience leading them all. We also have unique perspectives, having managed from both sides as clients and consultants.

## Engineering Design

From separations to hydroprocessing, our experienced and knowledgeable team has a proven record of success designing reliable processes with the flexibility to meet future demand as well as today's.

## Process & CFD Modeling

From simple hydraulics and heat transfer to complete unit operation simulations. We are experienced in nearly all modeling platforms.

## Process Troubleshooting

With over 40+ years of experience designing, managing, and operating facilities, there's a good chance we've seen your issue before.

## Commissioning & Startup

Our staff has commissioned and started dozens of units. From completions to safety reviews and field walkdowns, we've done it.

## Procedures & Training

We have actual operating experience and can help your team develop the right training and procedures to safely operate your facility.
