

LLHS SPONSORSHIP PACKAGES

We are at the forefront of creating and advocating for women in cyber.

We support a growing community through events, social media, mentoring, awards, online community, publications, opportunities, offensive & defensive technical CTFs, and much much more.

We focus first on building technical skills in a no pressure environment

Our focus is on realistic knowledge and skill sharing between women in the security field.

We heavily incorporate technical engagement, although we do embrace our none technical members, who add value to our society in so many ways.

Join these brands in supporting our mission!
