

ETHOS CLEAN FUSION *Deluxe* **[MRFS-1]**

The Ethos Clean Fusion Deluxe MRFS-1 Foot Switch provides remote switching control of the D-Channel's 3 position ACCENT Toggle Switch. When the ECFD toggle switch is set to its center position, the MRFS-1 can select the MID, BRITE, or both MID and BRITE, D-Channel circuits. The MID circuit lowers-shifts the TREBLE control's corner frequency adding rich MID's. The BRITE circuit adds high frequencies where highs are greater with lower GAIN control settings and decrease as the GAIN control is increased. A 12" RJ45 interface cable is furnished when you purchase the MRFS-1 pedal.
