## Principle Research Solutions

Summer 2021 Edition

**Hi everyone!**

We hope that you are having a great summer. Thank you for following our newsletter. We would not be here without you. For the next PRS newsletter, we would like to add a section for **participant testimonials**. If you would like to share your experience, please let us know. We would be happy to share your story and we **know** that others would love to hear it.

## Enjoy the summer!

### MEET ONE OF OUR PROVIDERS

Dr. Reed is a native of Spokane and received her bachelor's degree from Boston College, graduated from medical school with honors from the University of Washington, and completed her dermatology residency training at Duke University Medical Center in Durham, NC. While at Duke, Dr. Reed spent a year devoted to clinical research on hair disorders empowering her to be our local expert in hair diseases. She also trained with two respected pediatric dermatologists and enjoys caring for young patients with dermatology needs.

After residency, she returned to Spokane with her husband and three busy young sons. They enjoy all the outdoor activities the Pacific Northwest offers, including camping, hiking, skiing and spending time with family and friends.

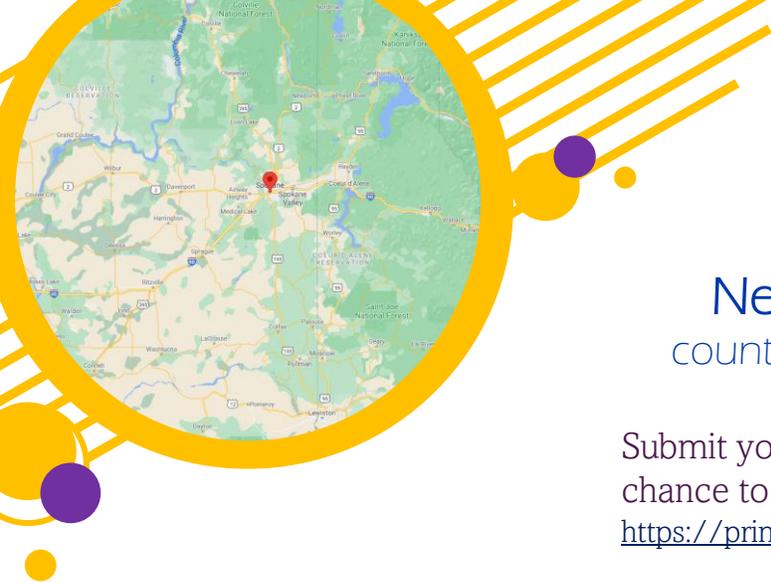

Dr. Reed enjoys caring for her practice patients with dermatology conditions including skin cancer, psoriasis, acne, and eczema. Skin cancer screening, surgeries, and cosmetic procedures (like Botox and laser treatments) are also offered in her clinic.

Dr. Reed is passionate about clinical research and takes great pride in her work as a Principal Investigator. Bringing new treatment options to market for patients is just one of the benefits of research. Current trials include alopecia areata, atopic dermatitis, psoriasis, prurigo nodularis, notalgia paresthetica, and bullous pemphigoid.

### Summer Fun Fact

Popsicles, a popular summer treat, were accidentally invented by an 11-year-old boy in San Francisco in 1905. He left a glass of soda sitting outside and by the next morning the soda had frozen. He began selling them at an amusement park in New Jersey.

Previous Trivia Answer - There are 76 lakes within a one-hour drive from Spokane.

Next Trivia Question - Name the city and country where the first modern Olympic Games were held, back in the summer in 1896?

Submit your answer on our website by August 10th for a chance to win a "Safe in the Sun" Basket.
