

NITROGEN

TIRE FILL

from

The Experts in Nitrogen Generation.

(N2G) Nitrogen Generation Systems, L.L.C. has over 20 years of experience in building, selling and servicing nitrogen generation equipment. Our NTF series of nitrogen generators are used in thousands of automotive dealerships, tire shops, automotive truck centers, and motorcycle dealerships. We pride ourselves in fast, friendly customer service. Visit nitrogentirefill.com for more information.

Benefits of Nitrogen Filled Tires:

- 4 times more tire pressure retention.
- Reduction in false tire sensor alerts.
- Zero corrosion of rims and tire sensors.
- Better tire wear.
- Improved fuel economy.

Nitrogen Service Provider Benefits:

- Profitable. Continually generates nitrogen from air.
- Fast return on investment.
- Increased customer retention.
- Increased customer satisfaction (reduced TPMS alerts).
- Gives you the ability to service customers with Nitrogen tires (top-offs).
- Simple to use. Minimal time needed by a technician. Very low operating costs.

The Experts in Nitrogen Generation.

NTF-8 Nitrogen System

NTF-6x2 Nitrogen System

NTF System Information:

- Portable and fully automatic NTF series nitrogen generators continually produce high purity nitrogen from your compressed air source. Generate your own Nitrogen for every tire you fill.
- NOT A MEMBRANE SYSTEM. Advanced Pressure Swing Absorption (PSA) technology provides long, dependable system life with low operating cost, low air consumption, and higher N₂ purity. A much better technology to hold up against water and oil contaminated compressed air.
- Equipped with automatic (4-6) tire deflate/purge/fill systems.
- Easy to use. Simply connect the hoses to the tires, set the pressure and push the 'go' button. The system performs 2 deflation and 2 inflation cycles with automatic stop at desired final pressure setting. No monitoring required.
- Complete with compressed air filtration and automatic drain.
- Four 24' hoses with locking Nitrogen tire chucks.

NTF-8 and NTF-6x2 Operating Specifications:

Dimensions	52" H x 21" W x 25" D
NTF-6x2 Output	6 CFM Max 95-98% N ₂
NTF-8 Output	13 CFM Max 95-99.5% N ₂
N ₂ Storage	28 gallons
Comp. Air Input	100-160 PSI 15-30 CFM
Filtration	Filter/Regulator equipped
Power Required	110Vac 60Hz
