

Quality Programs For Kids

After School Program at Shaarei Shomayim

LEGO CREATIONS

PROGRAM DESCRIPTION:

This program challenges students to design and create a variety of different themed LEGO creations. Throughout the program, students will learn the basics of building and exploring all the possibilities that exist with LEGO! Each week students will be given a new exciting Lego theme and challenge to work with. They will have 5 minutes to plan out their creations, and another 50 minutes to put them all together. Students will also learn how to use IPADS to take multi-angled before & after photos of all their LEGO creations & structures. On the last day of the program, each student will receive a brand new Create IT USB key to take home with a Photo Slideshow movie showcasing all their LEGO creations! This is truly a one-of-a-kind LEGO building experience!
