

BioWash

BioWash is a Biological Degreaser for removing oils and greases from components in all makes of specially designed heated and aerated parts washers. The powerful Biologically rich cleaner digests its own oily wash water using Bioremediation, a process that contains microorganisms which degrade the removed oils and greases, guaranteeing extended working lives of the cleaning solution.

Cleaning results remain at a constantly high level unlike a solvent cleaner, even with increased dirt ingress. This is a user-friendly and environmentally compatible alternative to washing with solvents. Using BioWash means more occupational Health and Safety benefits and reduced operating costs. No expensive solvent waste removal costs and Zero VOC emissions.

Key properties:

BioWash contains a blend of selected oil degrading bacteria, Low Foaming cleaning surfactants and a film forming rust inhibitor.

- Biological Cleaning
- Separator Friendly
- Low Foaming

Approval:

- Rust Inhibited - AMS1526B
- Separator Friendly -PR EN 858

Description:

Cleans using natural biological processes

- BioWash cleaner as a ready to use solution for removing oils, greases, cooling agents etc from parts
- The special micro-organisms break down the oils and fats, ensuring that the cleaning fluid can be used for longer, while maintaining a high cleaning performance
- Does not produce volatile organic compounds (VOC-free)
- Not subject to solvent regulations
- Non-Flammable
- No special additional safety measures required other than normal eye and glove protection during use
- Labelling not required
- Universal use

Safe handling & storage:

Store in original containers and avoid extremes of temperature. For guidance on handling and disposal see Material Safety Data Sheet

Packaging:

1,000ltr IBC, 200Ltr Drum, 25Ltr Container

Further information: (Only available in the UK & Ireland)
