The information we provide is not intended to be a substitute for medical treatment. Please consult your medical care provider before using herbal medicine, particularly if you have a known medical condition or if you are pregnant or nursing. As with conventional medicine, herbal medicine is vast and complex and must be used responsibly. People react differently to different remedies. Some herbs are contraindicated with certain pharmaceutical drugs. Further, some helpful herbs may be confused with harmful and/or deadly substances. Always refer to your healthcare provider for questions about your health.
