STAINLESS STEEL FASTENINGS

"U" NUTS-PRONG FORM AND KEYHOLE
THREAD IMPRESSIONS

We welcome the opportunity of giving advice on the choice of fastener most suitable for your application. Should a standard part be unavailable for your particular needs, we will have a special component designed, developed and produced for you.

Our field service is only a phone call away to visit and discuss any fastening problem you feel that we can assist you with.

Similarly, our sample service is always available and prompt attention is assured for parts to be mailed, delivered or collected on request.
