Description

The Carver Legacy: A Tradition of Innovation

Since its founding in 1954, **Carver Yachts** has been a pillar of American boat building, starting from a small facility in Milwaukee before moving to their iconic home in Pulaski, Wisconsin. Carver earned its reputation by prioritizing "livability" above all else, mastering the art of maximizing interior volume in a way few other builders could match. By the early 2000s, Carver had refined its **Advanced Structural Technology (C.A.S.T.)**, a system that eliminated structural wood below the waterline and utilized fiberglass stringers to ensure long-term durability. This commitment to engineering allowed them to create the "Great Room" concepts that made their motor yachts feel like floating penthouses, establishing Carver as the go-to brand for families who value comfort and residential-style amenities.

The Carver 350 Mariner: The Ultimate Social Cruiser

The **2002 Carver 350 Mariner** is a masterclass in space management, famously offering an interior that dwarfs almost every other boat in the 35-foot class. Its "Mariner" design is legendary for its single-level floor plan, achieved by elevating the side decks to eye level. This clever architecture creates a massive, full-beam salon with a soaring ceiling, providing an open-concept living area that feels more like a 40-foot yacht. Whether you are hosting a dinner at the U-shaped dinette or relaxing in the airy salon, the 350 Mariner is designed to be the ultimate social hub for weekends on the water.

Outside, the 350 Mariner continues to impress with its thoughtful ergonomics. The massive flybridge is the star of the show, featuring a wet bar and enough seating for your entire crew to enjoy the view while underway. Access is made easy and safe via molded-in steps from the cockpit—rather than a steep ladder—making it a favorite for owners with pets or young children. With its robust modified-V hull and twin-engine reliability, the 350 Mariner is a stable, comfortable cruiser that bridges the gap between a sleek express and a massive motor yacht.

EQUIPMENT DETAILS

ENGINES and PROPULSION

- Twin 320hp 6.1L 350 Mag MPI MerCruiser Inboard Engines with V-Drives
- approx 1380 hours on each
- Kohler 7.3 Generator
