BREEZEWAY YACHTS INC

Description

One owner boat, always sailed in Fresh waters of the Great Lakes. Well outfitted with windlass, head and main sail furling, Heat and Air, new electronics with radar, twin helms.

Bavaria Yachts' engineering is refined to the nth degree. Hulls are laid up by hand, with fiberglass skins sandwiching Airex foam, reverting to a solid fiberglass laminate below the waterline and in way of any through-hull fittings. The deck is also foam-cored, with aluminum plates providing extra strength where deck gear is mounted. Holes for fasteners, hatches and other openings are cut by a CNC robot to ensure exact tolerances.

A structural pan is laminated into the hull to stiffen the boat and spread keel and rig loads, and the main structural bulkhead is laminated in place. There's also a collision bulkhead in the bow. Cast iron ballast is carried low in a flattened bulb in both the deep and shoal-draft keel options. The Seldén 9/10ths fractional rig comes standard with in-mast furling, and is deck-stepped with swept-back spreaders. The cap and lower shrouds are taken to chainplates at the gunwales.
