2014 Catalina 385 for Sale in Kingston, Ontario

Exceptional 5-Series Cruising Sailboat with Bow Thruster and Solar Power

About Catalina Yachts

Catalina Yachts stood as one of the most respected and enduring sailboat builders in American maritime history. Founded by Frank Butler in 1969, the company built its legendary reputation on a straightforward philosophy: create honest, seaworthy, comfortable cruising yachts that deliver exceptional value and long-term durability. Over more than five decades, Catalina manufactured tens of thousands of vessels, earning an exceptionally loyal following among coastal cruisers, blue-water adventurers, and weekend sailors alike across North America and around the globe.

What truly set Catalina Yachts apart was their unwavering commitment to customer-focused engineering and structural integrity. Built using time-tested construction methods, hand-laid fiberglass hulls, and lead keels, Catalina sailboats are renowned for their forgiving handling, solid construction, and ease of maintenance. The company constantly refined its designs based on direct feedback from owners, culminating in award-winning production models that hold their resale value remarkably well in the pre-owned yacht market.

The Catalina 385

Introduced as a flagship model in Catalina's acclaimed 5-Series, the Catalina 385 represents the perfect balance between modern performance, ease of short-handed handling, and expansive interior accommodations. Designed by Gerry Douglas, the 385 incorporates key structural innovations such as the StrikeZone watertight collision bulkhead forward, the Deep Defense grid system for ultimate hull stiffness, and a dedicated T-beam mast step structure. This meticulous approach to safety and performance makes the Catalina 385 an ideal cruiser for navigating Lake Ontario, the Thousand Islands, and beyond.

On deck, the Catalina 385 showcases a sleek profile with clean sightlines and an exceptionally functional layout. The wide side decks and secure handrails ensure safe movement fore and aft, while the ergonomically designed cockpit provides an extraordinary comfort level for both short-handed sailing and entertaining guests. With all primary control lines led gracefully aft to the coachtop, trimming sails requires minimal effort, making this 38-foot cruiser a delight to sail single-handed or shorthanded in varied weather conditions.

Under sail, the Catalina 385 delivers impressive responsiveness and balance across a wide range of wind angles. Her optimized hull form provides smooth tracking and steady tracking, while the modest draft shallow wing keel configuration allows access to quieter anchorages and shallow coves that deeper draft vessels simply cannot reach. Coupled with a reliable Yanmar diesel engine and a bow thruster for effortless close-quarters maneuvering around the marina dock, the 385 offers complete confidence in every docking scenario.

Step below deck, and the interior volume of the Catalina 385 immediately impresses with warm, hand-finished teak joinery, excellent headroom, and abundant natural light from strategic hatches and portlights. The flexible salon layout, dedicated nav station, spacious master stateroom with an electric reclining berth, well-equipped galley with refrigeration, and separate shower stall in the head make extended cruising or living aboard in complete comfort an absolute reality.

Vessel Highlights

- **Reliable Auxiliary Propulsion and Maneuvering:** Powered by a Yanmar 3JH5E 40hp diesel engine with a 3-blade cruising propeller, complemented by a dedicated bow thruster for stress-free marina handling.

- Sailing Systems: Features an in-mast Selden furling mainsail system, Schaefer headsail furling with 135% genoa, Garhauer coachtop traveler, boom vang, dual backstays, and two-speed self-tailing primary and coachtop winches.
- Comprehensive Raymarine Electronics: Equipped with an e7 widescreen chartplotter with Wi-Fi, p70 Smartpilot autopilot with linear drive, i70 wind instrument, two i70 multi displays at the helm, and a Ray55 VHF radio with RAM mic.
- Off-Grid Power and Comfort Systems: Outfitted with 2 x 100-watt Sunpower solar panels with a Victron charge controller, reverse cycle heat and air conditioning, electric windlass, and a Fusion stereo system with salon and cockpit speakers.
- Canvas and Deck Amenities: Includes a canvas dodger, bimini, and full cockpit enclosure for all-weather protection, walk-through transom, removable helm seat, observation seats on pushpits, cockpit table with varnished teak leaves, and hot/cold transom shower.
- Luxurious Accommodation Layout: Bright salon with UltraLeather upholstery, bulkhead-mounted table, converting starboard settee, forward master stateroom featuring an innerspring mattress with electric lifter, aft guest cabin, and a private head with an electric macerating toilet and separate shower stall.
