

Mariner Boat Hoarding is a polyester fabric topped with a PVC lacquer that has been developed to withstand the harsh Australian conditions. Stringent quality control and premium quality materials make Mariner Australia's leading fabric for marine canopies and covers. Mariner is coated with a PermaShield surface to enhance protection and provide ease of maintenance. Mariner also contains a 'Bio-Pruf' formulation and is finished with a waterproof backing to provide exceptional protection against mould and mildew.

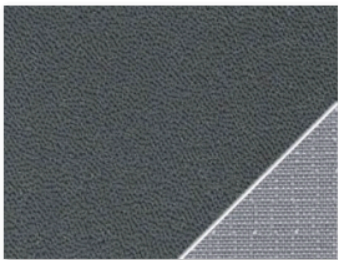

The Mariner colour palette will compliment any colour scheme and is designed to co-ordinate with the [Capri Marine Upholstery Vinyl](#) range. Typical applications include completely waterproof marine canopies and covers.
