

# NuFusion SHUTTERS

NuFusion Shutters are elegant and functional window coverings suited to any indoor area in your home. By incorporating aluminium core inserts in both the solid elliptical blade and panel stiles, NuFusion Shutters deliver higher strength and greater rigidity which prevents sagging and distortion.

NuFusion Shutters come standard with a 20 year warranty to give you added peace of mind. We guarantee your shutters will not chip, crack, split or distort and will look as good as new for many years.

You have complete control of your living environment by simply adjusting the blades – open to allow the cooling effect of summer breezes or close to retain heat in winter.

Available in fixed, hinged, sliding or bi-fold styles, NuFusion Shutters enhance both modern and traditional architecture. Choose from our range of 8 designer colours or select a custom colour to suit your décor.

Aluminium core  
in louvre blades  
& panel stiles
