

PACIFIC NORTHWEST MUSHROOMS

GROW AT HOME KIT

SEALED TOP OF TENT

SEAL

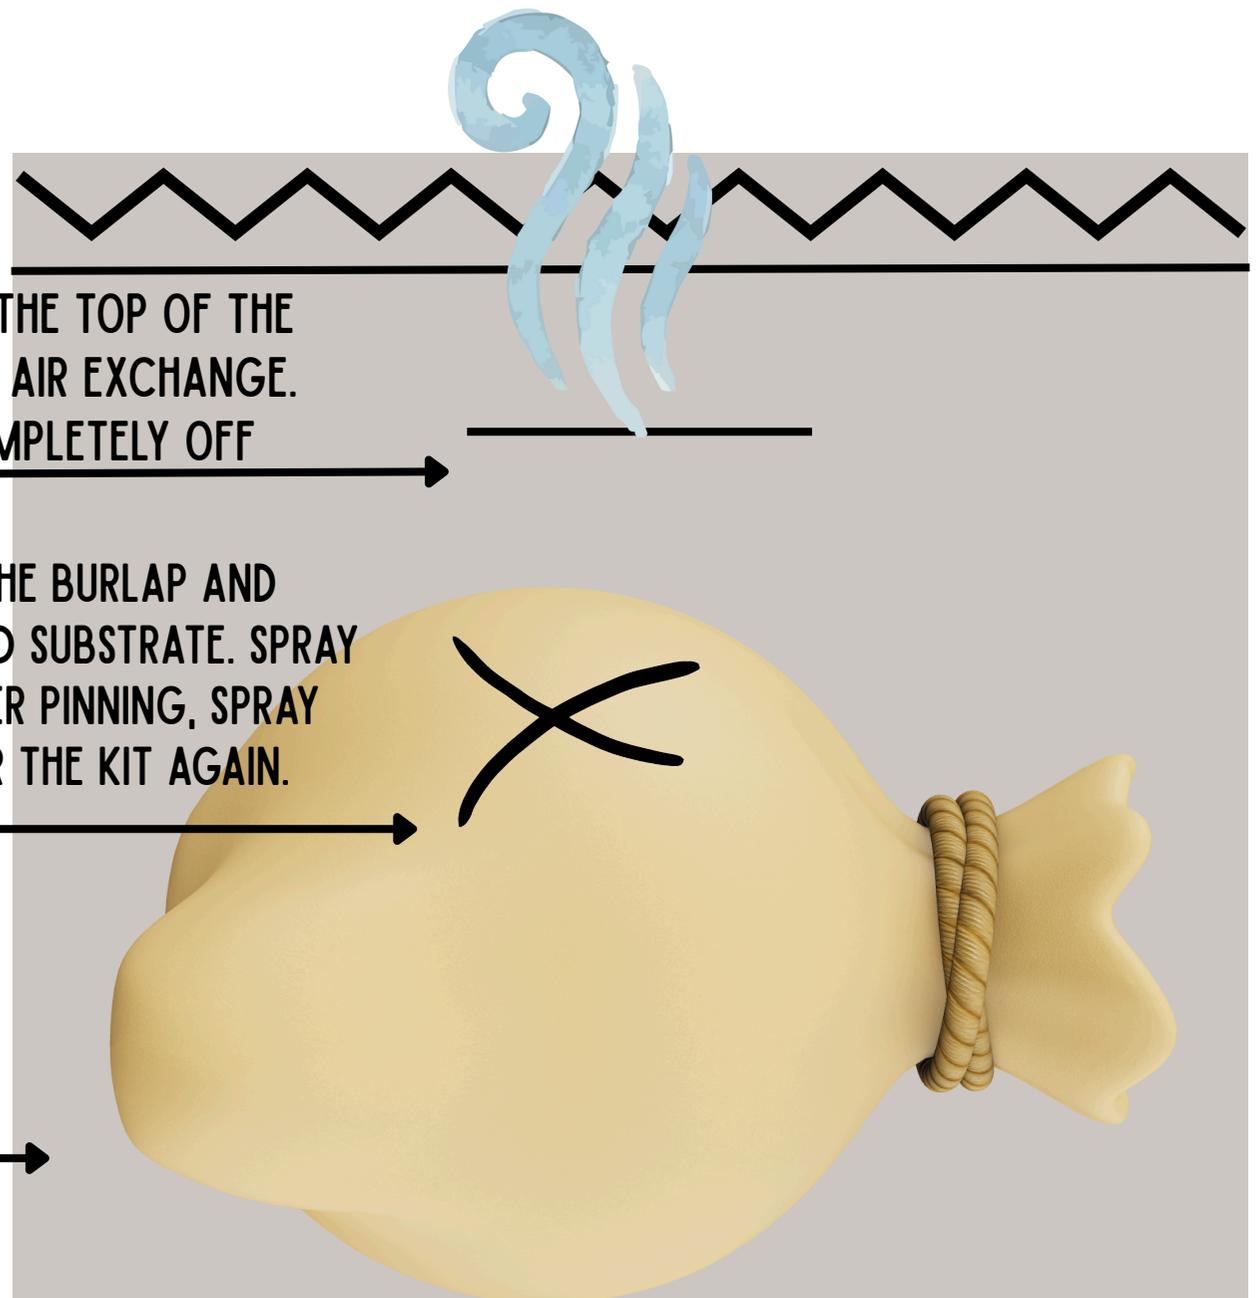

MAKE A 3 INCH SLIT BELOW THE TOP OF THE TENT WHERE IT'S SEALED FOR AIR EXCHANGE.

DO NOT CUT THE TOP COMPLETELY OFF

SLICE YOUR 4 INCH "X" INTO THE BURLAP AND PLASTIC COVERING THE COLONIZED SUBSTRATE. SPRAY WITH WATER UNTIL PINNING. AFTER PINNING, SPRAY INSIDE OF THE TENT AND COVER THE KIT AGAIN.

COLONIZED KIT

OPEN BOTTOM OF TENT

WHY A TENT?

OUR "TENT" IS A TURKEY BAG. ITS PURPOSE IS TO HELP KEEP IN HUMIDITY WHEN NEEDED BY COVERING THE KIT AFTER EACH TIME YOU SPRAY IT. THINK OF THE TENT AS KEEPING IN DEW LIKE YOU'D SEE IN A FOREST OF MUSHROOMS. FIRST, SPRAY DIRECTLY ON THE "X" PRIOR TO PINNING. ONCE PINNING BEGINS, TAKE THE TENT OFF AND SPRAY INSIDE OF THE BAG AND NOT ON THE PINNING FRUITS. COVER THE KIT BACK UP. YOU SHOULD SEE CONDENSATION HAPPENING INSIDE OF THE BAG. DO NOT LET WATER TOUCH THE NEW PINS.
