Dragon warrior monsters 2 breeding guide

Dragon warrior monsters 2 breeding list. Dragon warrior 2 recommended levels. Dragon warrior monsters 2 breeding tips.

[illegible]

If you want to search for a particular monster try the Breeding Search page. Boss Family The Boss Family are some of your favorite bosses from past Dragon Warrior games. They are powerful and difficult to obtain. Beast Family The Beast Family resembles animals, but they are able to resist special skills that lower attributes. They too have a strong attack and high HP. Devil Family These little monsters are fierce fighters with high HP, Attack and Defense. They can withstand strong magic attack and other special attacks. Bird Family The members of this family are speedy and grow quickly. They defend well against Thunder magic and Thunder special skills. Bug Family The insect Family is strong against poisonous attacks, and have a great capacity for increasing their attack and defense attributes.

Plant Family Despite being plants :) they do have high intelligence and MP, and have the ability to grow to high levels in these areas, but have low agility.

Slime Family This Family is a good support group during battle, they also grow rapidly and have high agility and can grow quickly in attack and defense.

Zombie Family The Zombie Family has high HP but are low in most of the other attributes being average to feeble and are weak against spells such as paralysis. **Dragon Family** These guys are obviously strong against fire attacks, but can also repel blizzard attacks. All attributes are high, but they grow slowly. **Materials Family** The Materials are made of natural materials like mud and stone, so they can resist cold and fire well and have high defense attribute. **Water Family** This is a new Family that was added for DW2.

Thanks to Jimmu_Dudeski for expanding on the breeding data from Jimeous. Text Version of the breeding guide.
