Please send me your opinion on AB 359 (Cooper) or how you would like CNS to participate, yea or nay. You can look it up under Business and Professions cmte to which it has been referred, viz, AB 359 would establish an exception for an applicant who holds an unrestricted license as a physician, viz., Legislative Counsel's Digest from 1 Feb 2021. The authors state that the bill is "to immediately increase the number of licensed medical doctors (MDs) practicing in California, by adjusting the reciprocity statutes that govern them consistent with the reciprocity statutes that already apply to other independent, out of state health care practitioners, like Doctors of Osteopathy."

Let me know how you would like CNS to advise the committee, yea or no on passage of AB 359.

So far we've heard from Drs. Stella Legarda, Robyn Young, and George Sarka whose statements have been filed with CNS -- since this is now in B&P cmte it is time to tell the B&P committee members how CNS members feel they should vote.

Thank you George. I very much admire everyone's zeal, hard work and enthusiasm keeping the CNS so vibrant!

Best wishes,

Steve
