CLINICAL WASTE MANAGEMENT

Aesthetic Clinic Waste Compliance Checklist

Free PDF Download

Running an aesthetics clinic involves strict responsibilities when managing clinical waste. From Botox®, dermal fillers to microneedling and injectable treatments, ensuring compliant waste disposal is essential for protecting staff, clients, and the environment. This checklist has been designed to help aesthetics practitioners understand the key requirements for safely segregating, storing, and disposing of clinical waste generated during cosmetic procedures.

This checklist helps clinics:

- Improve compliance procedures
- Reduce sharps injury risks
- Understand healthcare waste colour coding
- Maintain safer treatment environments
- Prepare for inspections and audits
- Ensure correct sharps and clinical waste disposal
- Stay compliant with UK healthcare waste legislation
