

PROLINQ Ltd
CLINICAL WASTE MANAGEMENT

Clinical Waste Compliance Checklist (HTM 07■01)

Waste Segregation

- Waste segregated using correct colour-coded containers
- Sharps disposed in approved sharps bins
- Pharmaceutical waste separated correctly
- Offensive waste stored separately from infectious waste

Storage

- Waste stored in a secure designated area
- Waste containers clearly labelled
- Restricted access to waste storage areas
- Waste not stored longer than recommended limits

Documentation

- Waste transfer notes retained for minimum 2 years
- Consignment notes kept for hazardous waste
- Waste carrier licence verified
- Duty of care documentation maintained

Staff Training

- Staff trained in clinical waste handling procedures
- Sharps injury protocol in place
- Training records maintained

Collection

- Waste collected by licensed waste carrier
- Collection schedule prevents overfilled bins
- Emergency collection arrangements available
