

# **Cleaning SOP: Dish Pit Cleaning Procedure**

### **Purpose:**

Ensure the dish pit is cleaned efficiently and effectively during the designated shift to maintain hygiene and operational standards.

### Scope:

This SOP applies to all team members responsible for cleaning the dish pit between 7:00 PM and close (12:00 AM).

#### **Materials Needed:**

- Dish trays
- Cleaning brushes
- Sanitizer solution (use a 1:32 ratio of sanitizer to water)
- White towels (found under the front counter)
- Hot water for soaking
- Mop and bucket
- Hose

## **High-Level Checklist**

- 1. Clean back-of-house areas during lulls (shelves, floors, walls, stock organization).
- 2. Respond to customers by prioritizing service ("car" call system).
- 3. Maintain dishwashing workflow, including ice cream machine parts.
- 4. Wash and dry dishes using proper dish tray drying paths.
- 5. Clean ice cream scoop station at the end of each cycle.
- 6. Communicate with the manager about the pace and completion of tasks.

# **Step-by-Step Instructions**

### **Step 1: Initial Setup**

- 1. Ensure all cleaning materials are available (brushes, sanitizer, towels, etc.).
- 2. Set up the dish pit with empty dish trays in their starting positions.

### **Step 2: Clean Back-of-House During Lulls**

- 1. Identify slow periods during the shift to clean:
  - Wipe down shelves using a clean cloth and all-purpose cleaner.
  - Mop the floors with hot water and cleaning solution.
  - Wipe walls with a damp cloth to remove stains or debris.
  - Organize stock neatly to ensure easy access.
- 2. Stay alert for customer needs. When "car" is called, stop cleaning immediately and assist with service.

### Step 3: Dishwashing Workflow

#### 1. Ice Cream Machine Parts:

- Soak all removable parts in hot water mixed with a cleaning solution for 10 minutes.
- Scrub parts thoroughly with a brush, ensuring all cracks and crevices are clean.
- Rinse parts and place them in the dishwasher.
- After washing, place parts in cold sanitizer water (1:32 ratio) for 2 minutes.
- Dry parts using a clean towel before reassembling

#### 2. General Dishes:

- Spray dishes with the hose to remove debris before loading them into trays.
- Load trays into the dishwasher and follow the drying path:
  - Station 1: Place cleaned dishes on the drying rack above the dishwasher.
  - Station 2: Move dishes to the drying table.
  - Final Station: Hand dry dishes using a clean white towel.
- Organize dried dishes in their designated storage areas.

## **Step 4: Final Cleaning Tasks**

- 1. Clean and sanitize the outside of the ice cream scoop station.
- 2. Empty and clean the dishwashing sink and surrounding areas.
- 3. Communicate task completion to the manager for review.
