

## Mail Order Service Form

Thank you for considering Shear Precision for your sharpening needs.

We are trained master sharpeners, certified by the National Beauty Tool Sharpeners Guild (NBTSG). Using state of the art sharpening equipment, we are able to restore most shears to “like new” condition using traditional and contemporary methods.

Our quick and reliable service has your equipment returned within 3 - 4 business days; excluding shipping time which will vary depending on location.

### Instructions:

1. Wrap scissors or shears in material that will keep them protected during transit; like old newspaper or a padded envelope if they do not have a case. Clipper blades should be wrapped similarly, or placed in a blade box.
2. Fill out the order form on the other side of this paper, making sure to print all information clearly.
3. Place all items to be sharpened in a box or padded envelope along with the completed mail order form. Please be sure to tape both ends of the box securely! (Shear Precision is not responsible for lost or damaged items while in transit.)
4. Affix the No Postage Necessary USPS Priority Mail Shipping Label to the package. (This label covers \$50 shipping insurance.)
5. Give the package to your USPS Mail carrier, or place in a USPS drop box.

### Are My Shears Convex or Bevel?

Most commonly, if the blade of the shear looks similar to the top picture on the left then it's convex. However if the blade of the shear looks like the picture on the bottom left then it's a bevel. Typically a convex shear blade has no obvious angles from the spine to the cutting edge.

NOTE: If you are a hair stylist, you're shears are more likely to be convex with a hone line than a bevel without a hone line.

If you are a groomer it is likely that you'll have a mix of convex and bevel shears.

Still not sure? Estimate with the Convex- honed shear price. If it's a bevel- non honed shear we'll adjust the price accordingly.
