

Keeping  
us all  
**safe from**  
Covid-19

**I want you to feel completely comfortable coming to the clinic despite Coronavirus. So this summarises the precautions I'm taking to protect us both.**

- **Providing hand sanitiser for everyone.**

I use hand sanitiser before I start each Bowen treatment, and there's a bottle for you to use before you enter the clinic.

- **Enhanced cleaning processes**

using disposable anti-bacterial wipes between each client

- **Carrying out a full risk assessment for the clinic and for clients**

following comprehensive guidance issued by the Association of Physical and Natural Therapists (APNT), which specifically covers Bowen therapy

- **Pre-screening all clients**

to ensure that nobody who has been in contact with the virus comes to the clinic

- **Cancelling your appointment if I or you have the virus or shown symptoms**

or have been in contact with anyone who has symptoms in the last 14 days.

- **Wearing the appropriate PPE**

as required by Government guidance for close contact services

**You can download the full details of my current risk assessment and plan from my website [www.magichandscalminds.com](http://www.magichandscalminds.com), or by scanning this QR code.**

**Please note that notwithstanding all this, I operate from a shared building. I can't control what happens outside the door of the clinic. Please take your own precautions in the rest of the building.**
