FACT SHEET

ABOUT US

Alpha X AI™ is a Small Disadvantaged Business (SDB) that innovates futuristic Artificial Intelligence (AI) solutions to support federal and commercial interests by prioritizing superior performance and coherent integration. Our futuristic solutions entail Generative AI, hyper-automation, quantum-ready architectures, and other next-generation innovations. Our mission is to transform how organizations protect, detect, and respond to threats by leveraging automation, analytics, and adaptive learning to modernize, secure, and strengthen framework applications.

Our capabilities encompass policy changes, asset and document management, natural language understanding, computer vision, predictive analytics, and conversational agents. These are combined with end-to-end MLOps for data ingestion, model development, continuous validation, and secure cloud or edge deployment. Our team partners with organizations to translate domain expertise into scalable AI that measurably improves decision quality, operational resilience, and stakeholder trust.

Core Capabilities

- **Monti™: Conversational Agents**
- **Good chat: Safe Chat**
- **Change AI™: Policy and Governance Automation**
- **Titan AI™: Intelligent Asset, Logistics, and Supply Chain Management**
- **Artemis Life Sciences™**
- **Raven AI™**
- **Natural Language Understanding (NLU)**
- **Computer Vision**
- **Predictive Analytics**
- **MLOps Lifecycle Management**

NAICS

- **541511 – Custom Computer Programming Services**
- **541512 – Computer Systems Design Services**
- **541513 – Computer Facilities Management Services**
- **541519 – Other Computer Related Services**
- **541715 – Research and Development in the Physical, Engineering, and Life Sciences**
- **541713 – Nanotechnology Research**
- **541714 – Biotechnology Research**
- **541690 – Other Scientific & Technical Consulting Services**
- **518210 – Data Processing, Hosting, and Related Services**
- **541618 – Other Management Consulting**
- **541330 – Engineering Services**

Why Alpha X AI™

- Mission-ready, high-performance AI
- Rapid development and deployment cycles
- Scalable solutions built for real-world complexity
- Ethical, secure, and compliant AI frameworks
- Tailored systems that evolve with your organization
