Alpha X AI™ Intellectual Property Policy

Effective Date: October 30, 2026

Last Updated: October 30, 2026

Alpha X AI™ ("Alpha X AI™," "we," "us," or "our") respects intellectual property rights and expects Customers, Authorized Users, developers, contractors, partners, and other users to respect the rights of Alpha X AI™ and third parties. This Policy applies to the Alpha X AI™ websites, software, platforms, models, APIs, agentic workflows, conversational agents, automation systems, documentation, technical materials, digital content, and other Services and materials made available by the applicable Alpha X AI™ contracting entity. Any reference to Alpha X AI includes their platforms and services.

Users are responsible for ensuring that they possess the rights, permissions, licenses, and authority needed to submit, use, reproduce, adapt, distribute, or otherwise process content, data, software, and materials in connection with the Services.

Alpha X AI™ may investigate credible allegations of infringement and may take action consistent with applicable law, contractual obligations, and any applicable license, including restricting access, disabling a feature, suspending access, or pursuing available remedies.

Intellectual Property of Alpha X AI™

Alpha X AI™ and its licensors retain the rights they respectively own or license in the technology and materials used to provide the Services. Those materials may include, without limitation:

• artificial intelligence models, machine-learning systems, model configurations, algorithms, and related technology;

• software, source code, object code, APIs, applications, platforms, and system architecture;

• agentic workflows, orchestration logic, prompts, evaluation methods, and automation processes;

• natural-language, predictive analytics, computer-vision, data classification, search, and asset-intelligence technologies;

• governance, policy-enforcement, security, monitoring, and operational-control systems;

• interfaces, dashboards, reports, documentation, research, training materials, and technical materials;

• trademarks, service marks, logos, trade names, product names, and brand identities;

• trade secrets, confidential information, inventions, methods, processes, and know-how; and

• other proprietary technologies, materials, and intellectual property used to provide or support Alpha X AI™ Services.

Except where Alpha X AI™ expressly grants permission through a written agreement or applicable license, no ownership interest in Alpha X AI™ intellectual property is transferred to a user.

Trademark Policy

A trademark is a word, name, symbol, design, slogan, logo, or other identifier used to distinguish the source of goods or services. Alpha X AI™ uses certain trademarks, trade names, logos, product names, and other brand identifiers in connection with its business and Services.

You may not use Alpha X AI™ trademarks, logos, or other brand identifiers in a manner that:

• suggests sponsorship, endorsement, affiliation, certification, or approval where none exists;

• creates confusion regarding the source, ownership, or origin of a product or Service;

• misrepresents your relationship with Alpha X AI™;

• associates Alpha X AI™ branding with unlawful, deceptive, fraudulent, or unauthorized activity;

• damages or is likely to damage the reputation or goodwill associated with Alpha X AI™; or

• otherwise infringes or violates Alpha X AI™'s or a third party's intellectual property rights.

Permitted Reference to Alpha X AI™ Trademarks

Where reasonably appropriate, use the ™ symbol with Alpha X AI™ on the first prominent reference and follow any applicable brand guidelines.

Limited use of the Alpha X AI™ name may be permitted when reasonably necessary to accurately identify Alpha X AI™ or its Services. A customer, partner, researcher, reviewer, or other authorized party may refer to Alpha X AI™ for truthful informational, descriptive, comparative, or nominative purposes, provided the use does not imply endorsement, uses no more of the mark than reasonably necessary, and does not use logos or distinctive branding without authorization.

Commercial, promotional, or other use of Alpha X AI™ trademarks beyond ordinary descriptive reference may require prior written authorization.

Reporting Trademark Concerns

If you believe a party is using an Alpha X AI™ trademark in a manner that infringes intellectual property rights or creates a likelihood of confusion, contact info@aialphax.com and provide sufficient information to evaluate the concern, including:

- identification of the trademark owner and mark involved;
- a description of the allegedly infringing use;
- the location of the use, including a website address where available;
- your contact information; and
- supporting documentation reasonably necessary to evaluate the report.

Copyright Policy

Copyright may protect original works of authorship, including software, documentation, written materials, graphics, audiovisual works, research, technical materials, user-interface elements, and other original creative works. Alpha X AI™ may own or license copyrights in its websites, software, documentation, publications, graphics, digital content, technical materials, product materials, and other proprietary works.

Users must not reproduce, distribute, modify, publicly display, publish, transmit, or otherwise use copyrighted materials owned by Alpha X AI™ or third parties except as authorized by the rights holder, license, agreement, or applicable law. Users may not submit or provide copyrighted material through the Services unless they possess the necessary rights or authority.

Reporting Copyright Infringement

If you believe that material made available through an Alpha X AI™ website, application, platform, or Service infringes your copyright, contact info@aialphax.com. Include sufficient information to identify and evaluate the allegation, such as:

- identification of the copyrighted work claimed to have been infringed;
- identification and location of the allegedly infringing material;
- your name and contact information;
- a statement that you have a good-faith belief that the disputed use is not authorized by the rights holder, its agent, or applicable law; and

• any additional information required by applicable law.

This Policy does not designate Alpha X AI™ or any named person as a statutory copyright agent. If a statutory notice requires a designated agent or a specific procedure, the correct legal entity and agent details must be verified and published separately before relying on this Policy as that designation.

Software and Technology

Alpha X AI™ may provide proprietary software, artificial intelligence technologies, models, APIs, agentic systems, workflow tools, dashboards, and other technology. Unless expressly authorized by a written agreement or applicable license, users may not:

• copy or reproduce proprietary Alpha X AI™ software or technology;

• reverse engineer, decompile, disassemble, or attempt to derive source code or underlying technology, except to the extent applicable law expressly permits;

• circumvent security controls, access controls, license restrictions, or technical protections;

• modify or create unauthorized derivative works;

• redistribute, sell, lease, sublicense, or provide the technology to unauthorized third parties;

• remove or alter proprietary notices; or

• use proprietary technology beyond the scope of the applicable license or agreement.

Some software, Services, or components may be governed by additional license terms, end-user license agreements, subscription terms, statements of work, or other written agreements.

License Scope and Acceptable Use

Access to or use of Alpha X AI™ software, models, APIs, platforms, documentation, and related technology does not transfer ownership or grant an implied license. Any permitted license is limited to the scope expressly stated in the applicable written agreement, order form, or third-party license. Users must comply with restrictions on copying, modification, redistribution, sublicensing, reverse engineering, extraction of model weights or confidential system information, circumvention of controls, and use beyond the authorized deployment or purpose, subject to any non-waivable rights under applicable law.

The Services may include third-party or open-source components subject to separate terms. The applicable third-party license governs those components, and this Policy does not expand any rights granted by the relevant rights holder.

Artificial Intelligence and Generated Outputs

The intellectual property associated with Alpha X AI™ technologies may include models, algorithms, software, architectures, workflows, prompts, evaluation methods, datasets, interfaces, security systems, and related materials. Access to or receipt of an AI Output does not grant ownership of the underlying Alpha X AI™ technology.

Ownership and permitted use of Customer Data, prompts, inputs, Outputs, customer-specific deliverables, and improvements or developments created in connection with a Service are governed by the applicable order form, Services Agreement, license, statement of work, or other written agreement.

Outputs may contain or reflect material not exclusively controlled by Alpha X AI™ and may resemble third-party material. Alpha X AI™ does not represent that it owns every element of every Output. Users are responsible for evaluating whether their intended use is lawful and whether additional rights or licenses are needed.

Customer Content and Data

Users must not submit content, data, software, or materials unless they have the rights and permissions needed for the intended use. Nothing in this Policy by itself determines ownership of Customer Data or conversation records. Ownership, processing, retention, and permitted use are governed by the applicable customer agreement and privacy or data terms.

Trade Secrets and Confidential Information

Alpha X AI™ may possess trade secrets and confidential information relating to its technology, operations, customers, research, software, methods, business strategies, data, and other activities. Users who receive confidential information from Alpha X AI™ must protect it and use it only for the authorized purpose for which it was provided.

Unless authorized by Alpha X AI™ or required by law, confidential information may not be disclosed, copied, reproduced, distributed, reverse engineered, or used for an unauthorized purpose. This Policy does not replace confidentiality or nondisclosure obligations in a separate agreement.

Third-Party Intellectual Property

The Services may incorporate, interface with, or rely upon third-party software, cloud services, APIs, data, open-source software, models, research, content, or other technologies. Those materials remain subject to the rights and licenses established by

their respective owners. Users must comply with applicable third-party licenses and restrictions.

Nothing in this Policy grants rights to third-party intellectual property beyond those expressly granted by the applicable rights holder. Notices and attributions will be provided as required by applicable licenses and the relevant product or deployment terms. No specific third-party notices URL is incorporated here.

Counterfeit, Unauthorized, and Misrepresented Products

Alpha X AI™ prohibits unauthorized use, reproduction, distribution, sale, licensing, or representation of products, software, technologies, Services, or materials as produced, authorized, certified, endorsed, or approved by Alpha X AI™ when they are not.

No person may falsely represent that a product, service, application, technology, component, or material is produced by Alpha X AI™, is an official Alpha X AI™ product, is compatible with or approved by Alpha X AI™ without authorization, has been certified or endorsed by Alpha X AI™, or is associated with Alpha X AI™ where no such association exists.

Reporting Intellectual Property Concerns

If you believe material, software, technology, documentation, branding, or other information associated with Alpha X AI™ infringes your intellectual property rights, contact info@aialphax.com and provide:

• your name and contact information;

• identification of the intellectual property right involved;

• a description and location of the allegedly infringing material or activity;

• information sufficient to allow Alpha X AI™ to evaluate the concern; and

• supporting documentation or other relevant information.

Alpha X AI™ may request additional information before evaluating or taking action on a report.

Enforcement and Remedies

Alpha X AI™ may investigate suspected violations of this Policy and take appropriate action consistent with applicable law, contractual obligations, and applicable licenses. Such action may include requesting additional information, restricting access to material or technology, suspending or terminating authorization, requiring cessation of unauthorized

use, reporting unlawful activity to appropriate authorities, or pursuing other legal or equitable remedies available to the applicable rights holder.

Alpha X AI™ is not obligated to investigate every complaint or dispute, and nothing in this Policy requires Alpha X AI™ to mediate disputes between third parties.
