

Alpha X AI™ Content and Conduct Policy

Effective Date: October 30, 2026

Last Updated: October 30, 2026

Overview

This Content and Conduct Policy applies to use of Alpha X AI™ websites, software, models, APIs, agentic workflows, conversational agents, automation systems, analytics, and related Services. It describes prohibited uses of the Services, Customer Data, and Outputs. It applies to Customers, Authorized Users, developers, administrators, and other persons who access or use the Services, subject to the applicable written agreement.

Alpha X AI's™ capabilities include: enterprise AI, automation, natural-language understanding, predictive analytics, computer vision, governance and policy automation, conversational agents, workflow acceleration, asset intelligence, and AI lifecycle tools. The Policy is intended to protect users, organizations, data, systems, and the integrity of AI-enabled operations. Technical safeguards may not detect or prevent every violation. Any reference to Alpha X AI™ includes all of their platforms and products.

Abuse of Alpha X AI™ Services and Systems

Do not misuse Alpha X AI™ or attempt to harm, degrade, disrupt, manipulate, or gain unauthorized access to the Services or their safety, security, or operational controls.

Examples of prohibited activity include:

- accessing accounts, systems, networks, APIs, dashboards, or data without authorization;
- deploying malware, harmful scripts, unauthorized automation, denial-of-service activity, or abusive traffic;
- bypassing access restrictions, quotas, safeguards, monitoring, licensing, or enforcement mechanisms;
- jailbreaking, prompt-injecting, manipulating, or otherwise attempting to cause a model or agent to disregard its authorized scope or safety rules;
- scraping, harvesting, or systematically extracting data, outputs, or model behavior except as authorized by documented functionality or written permission;
- probing for credentials, secrets, system prompts, model weights, confidential architecture, or non-public data; or
- impersonating Alpha X AI™, a customer, a public authority, or another person or organization for deceptive purposes.

Lawful and Authorized Use

Use the Services only for lawful purposes and within the permissions, deployment limits, and intended scope granted by the applicable agreement. Do not use the Services to violate applicable law, court orders, sanctions, export controls, procurement restrictions, or third-party rights.

Violence, Exploitation, and Serious Harm

Do not use Alpha X AI™ to create, plan, encourage, facilitate, or operationally support serious physical harm, terrorism, violent extremism, trafficking, exploitation, torture, or abuse. This prohibition includes operational instructions, targeting assistance, recruitment, evasion methods, or other material assistance for unlawful violence or exploitation.

Legitimate, authorized defense, public safety, research, historical, or policy work may require discussion of sensitive topics. Such work must remain within applicable law, authorization, the specific deployment agreement, and any controls that apply to the Service. No general permission is granted to facilitate unlawful harm.

Child Sexual Exploitation and Abuse

Do not use Alpha X AI™ to create, request, obtain, distribute, sexualize, exploit, groom, or facilitate abuse of a child, or to produce instructions, plans, or other material that enables child sexual exploitation or abuse. Attempts to evade this prohibition through fictional, hypothetical, coded, or roleplay framing are also prohibited.

Non-Consensual Intimate Imagery and Sexual Exploitation

Do not use Alpha X AI™ to create, obtain, distribute, threaten to distribute, or facilitate non-consensual intimate imagery, sexual extortion, sexual exploitation, or coercive sexual conduct. Any content involving sexual exploitation of a minor is prohibited.

Hateful Conduct and Discrimination

Do not use the Services to generate or facilitate threats, harassment, dehumanization, or discriminatory conduct targeting a person or group based on protected characteristics, or to promote violence or exclusion based on those characteristics. Good-faith educational, historical, analytical, or compliance work may address hateful conduct when it does not promote or facilitate it.

Fraud, Scams, Phishing, and Impersonation

Do not use Alpha X AI™ to create or facilitate fraud, scams, phishing, credential theft, deceptive impersonation, fraudulent offers, forged records, or communications designed to obtain money, data, access, or another benefit through deception.

Exposure of Personal Information

Do not use Microsoft products and services to share personal or confidential information about a person without authorization.

Prohibited activities may include sharing:

- Personal data such as location that may result in endangering someone else.
- Account username, passwords, or other information used for the purposes of account credentialing.
- Government-issued information such as Social Security Numbers or passport numbers.
- Private financial information including bank account numbers and credit card numbers, or any other information which facilitates fraudulent transactions or identity theft.
- Health information including healthcare records.
- Confidential employment records.

Intellectual Property Infringement

Do not use Alpha X AI™ to infringe or misappropriate copyrights, trademarks, patents, trade secrets, publicity rights, or other rights. Do not submit material unless you have the rights and permissions needed for the intended processing. Outputs may resemble existing material; users must assess rights and permitted use before publication or deployment.

Cybersecurity Abuse and Harmful Code

Do not use the Services to develop, deploy, conceal, or improve malware, ransomware, spyware, credential theft, unauthorized access, exploit chains, destructive code, botnets, or tools intended for unlawful surveillance, disruption, or exfiltration. Security research must be authorized, scoped, and conducted in accordance with applicable law and written engagement terms.

Misuse of Automated Decisions and High-Impact Outputs

Do not deploy an AI Output as the sole or unreviewed basis for consequential decisions affecting a person's employment, credit, healthcare, education, eligibility for public services, legal rights, or similarly significant interests where law requires human review, validation, notices, or other safeguards. Customers must evaluate and implement

appropriate governance, testing, oversight, appeal, and audit procedures for their use case.

Misrepresentation and Unsupported Claims

Do not falsely represent AI-generated content as verified fact, professional advice, an official decision, a human-authored statement, or an approved Alpha X AI™ capability. Do not claim that a Service is certified, compliant, validated, or approved by a regulator or government authority unless that claim is accurate and supported by current written evidence.

Restricted Environments, Export Controls, and Mission Use

Do not use the Services for prohibited end uses or make them available to restricted persons or jurisdictions in violation of export-control, sanctions, national-security, procurement, or other applicable requirements. Do not submit classified or controlled information unless the specific Service and deployment are expressly authorized for that information in writing.

System Integrity and Reverse Engineering

Except to the extent applicable law expressly permits otherwise, do not reverse engineer, decompile, disassemble, extract model weights, derive source code, discover non-public prompts or system logic, circumvent technical restrictions, or create derivative works from proprietary Services without written authorization.

AI Limitations and Responsible Use

Alpha X AI™ Services may incorporate artificial intelligence, machine learning, generative AI, intelligent agents, predictive analytics, automated reasoning, and other advanced technologies to analyze information, identify patterns, generate insights, support decisions, automate workflows, and perform other operational functions. Certain Services may also integrate with Customer systems, databases, applications, and third-party technologies. These technologies may produce inaccurate, incomplete, biased, outdated, or otherwise unsuitable results, and automated processes may not operate as intended in every circumstance. Alpha X AI™ does not guarantee that any AI-generated Output, recommendation, analysis, prediction, or automated action will be accurate, complete, reliable, or appropriate for every intended use.

Customers and Users are responsible for independently reviewing and verifying material Outputs and maintaining appropriate human oversight of AI-powered functions, particularly where results or automated actions may affect individuals, financial matters, legal rights, health, safety, employment, business operations, or other consequential

interests. AI-generated Outputs and recommendations do not constitute professional, legal, medical, financial, or other regulated advice and must not be treated as a substitute for qualified professional judgment.

Customers and Users must not misrepresent AI-generated Outputs as independently verified, human-reviewed, or officially approved when such review or approval has not occurred. They must also ensure that their use, configuration, and deployment of the Services, including any automated workflows, integrations, or AI-driven decisions, comply with applicable laws, regulations, and contractual obligations.

Alpha X AI™ may implement security controls, governance mechanisms, monitoring, filters, access restrictions, policy enforcement, and other safeguards designed to promote responsible, secure, and reliable operation. However, no safeguard or control can guarantee the prevention of every error, inappropriate Output, unauthorized activity, security risk, or unintended automated action.

Customers and Users remain responsible for the information and materials they submit to the Services, their configuration and deployment of AI-powered features, their review and use of Outputs, and any decisions, actions, or consequences resulting from their use of the Services.

Enforcement and Safety Measures

Alpha X AI™ may investigate credible reports of violations and may refuse requests, restrict functionality, disable integrations, suspend or terminate access, preserve relevant records where lawful, notify affected customers, or refer suspected unlawful activity to appropriate authorities. Measures will be applied subject to applicable law and the governing agreement.

Alpha X AI™ is not obligated to investigate every report or mediate disputes between third parties. A report should identify the relevant Service, describe the conduct, provide dates or locations where available, and include supporting information without unnecessarily exposing personal or confidential data.

No Guarantee of Detection or Prevention

Automated filters, monitoring, access controls, classifiers, human review, and enforcement measures may fail to identify or prevent every prohibited, harmful, or unlawful use. This Policy does not create a guarantee that every violation will be detected, blocked, reported, or escalated.

Reporting Concerns

Reports may be directed to info@aialphax.com. These general contact details are not represented as a designated statutory reporting agent or emergency-response channel.

Policy Updates

Alpha X AI™ may update this Policy to reflect changes in Services, law, security practices, or operational requirements. The effective date above identifies the current version. Any update process affecting contractual rights will be governed by the applicable agreement.
