An Emerging Global Stewardship Solutions Company

>>> Stewardship Excellence

>>> Overview

The world may change, but taking excellent care of people should not. As a global stewardship solutions company, Guess & Co. Corporation is committed to caring for people. We are the reliable partner to communities, companies and governments. We are prepared to address your pressing needs with prompt action that delivers ideal results. Guess & Co. Corporation delivers global stewardship through its four core business units: energy, health care, technology and real estate. As entrepreneurs and skilled business professionals with over 50 years of combined experience, Guess & Co. Corporation stands ready and we're with you.

>>> A Message from Our CEO

I would like to personally thank you for your interest in Guess & Co. Corporation. When I founded this company in 2017, I wanted to start something that could really make a positive impact. It is important to me that we do more than make a profit, but we must also solve problems and make contributions that change lives for the better. We firmly believe that Guess & Co. Corporation is uniquely positioned to deliver solutions in an ever-changing world. Our energy, health care, technology and real estate businesses present intelligent and smart ways to address issues facing all of us. Guess & Co. Corporation is leveraging the backgrounds and skillsets of many to provide innovation. I'm joined by a supportive Board and a dedicated team of individuals as fellow shareholders in our company and together we are committed to excellence in everything that we do. We are grateful to have the opportunity to serve you.

*Jerry D. Guess
Founder, Chairman, CEO & President*

>>> **Energy Stewardship**

Energy is necessary for all of us. Our Energy Group is more than a commodity provider. We focus on developing and providing energy solutions that are smart, reliable, sustainable, scalable, secure and are based on long-term considerations. Our goal is to provide solutions that last for centuries.

>>> *Technology Stewardship*

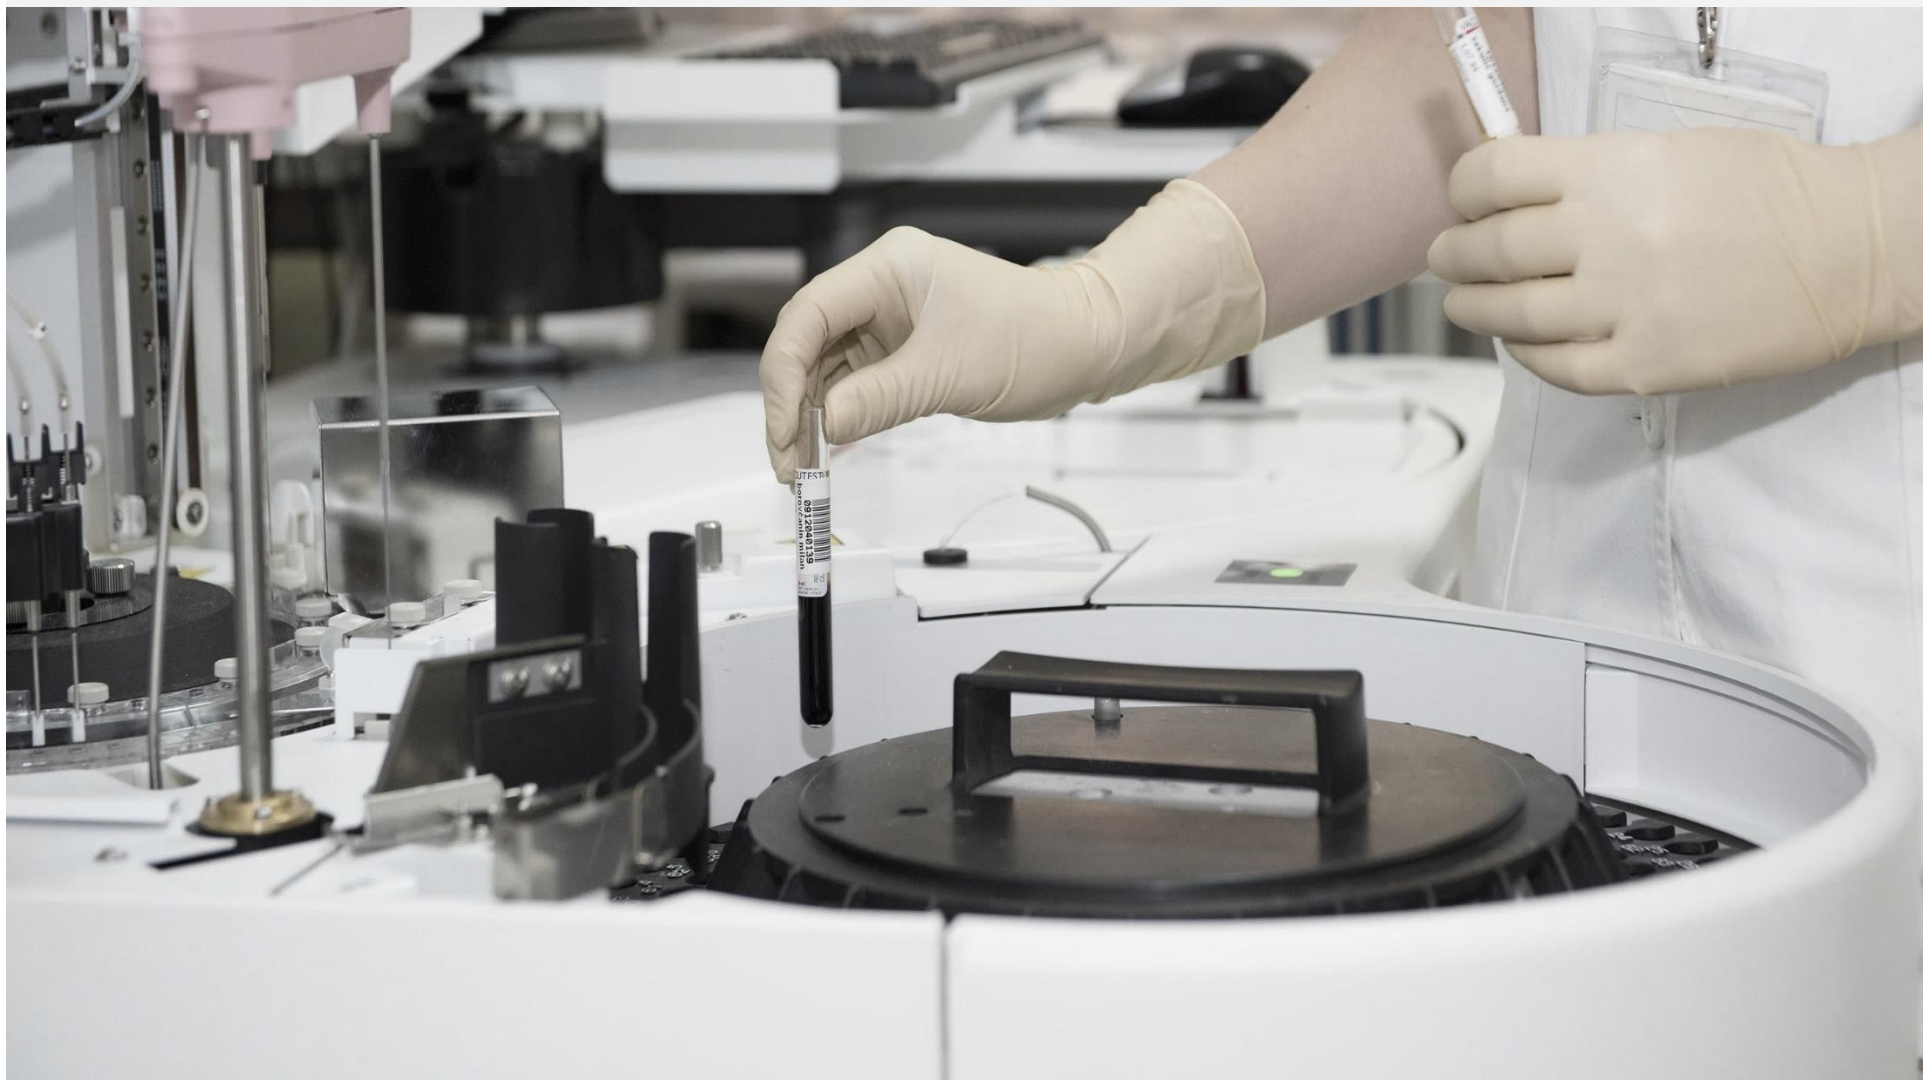

Technology operations contribute to our lives each day. Our Technology Group is more than programming codes. From telecom to cyber-security, we provide cohesive solutions that include smart systems. Our solutions may include technology-enhanced infrastructure such as smart bridges that provide accurate traffic count in real-time, accident notification and more.

>>> **Health Care Stewardship**

Health Care is a necessity for every human being. Our Health Care Group is more than medication or a medical device. We seek to improve the quality of life through viable treatments that lead to curing diseases. From antibiotic-resistant illnesses to terminal illnesses, we are focused on delivering health care solutions that bring about sustainable healing and vitality.

>>> **Real Estate Stewardship**

Real Estate is all around us. Our Real Estate Group is more than buildings. We are providing smart real estate that combines brick and mortar with technology to improve everyday living. Our company is developing real estate solutions that support community engagement, population increases and economic growth.

>>> Problem: Rural Community Is Disadvantaged

A rural community lacks growth and has a declining population due to its location. Unemployment is high, crime is rising, high school dropouts are on the rise. The population is in poor health. Poverty is considered a normal way of life.

>>> ***Solution: Community Redevelopment***

Through our real estate group, we partner with the local government in a public-private partnership structure. We identify the strengths of the community and help them capitalize on those.

Results:

*We Develop Luxury High Value Real Estate That Attracts Affluent Residents
Increased Tax Revenue From High Value Real Estate Provides More Funds For Better Schools
We Arrange Partnerships With Medical Professionals To Improve Health Care Access
An Improved Demographic Profile Attracts Corporate Investment
Corporate Investment Leads To A Vibrant, Safe, Healthy, Educated, and Employed Community*

>>> **Problem: Unreliable Power Grid, Repeated Failure**

Increasing tropical storms and hurricanes result in repeated failure of the power grid for a community. The continuous downtime results in economic losses for the public and private sector. Outages last for days and even weeks at a time. Businesses are leaving for places with reliable power grids.

>>> Solution: Enhanced Smart Grid and Reliable Power Supply

Our Energy group would partner with local and regional governments to study the cause of the repeated power outages. After we successfully identify those issues, our engineering team would develop a customized and enhanced smart grid that provides reliability around the clock with a 99.9999% up-time and employs proprietary back-up technology.

Results:

We Develop A Customized Enhanced Smart Grid For The Community and Reliable Power

Businesses Return To The Community Due To Power Stability

Tax Revenues Increase

Overall Economic Growth Occurs

Reliable Power Contributes To Business Confidence And Sustainable Long-Term Growth
