

Service Offering	Basic Description	Engagement Model / Delivery Period
Critical Infrastructure & Chokepoint Assessment	Identifies dependencies on transportation, power, water, telecommunications, ports, processing capacity, and other infrastructure capable of disrupting production.	Contracted Project
Critical Materials & Component Dependency Assessment	Identifies dependence on difficult-to-source materials, components, processors, countries, and single-source suppliers.	Contracted Project
Current & Emerging Threats	Tailored training addressing cyber, insider, geopolitical, hybrid, infrastructure, and other emerging threats relevant to the organization.	Half-Day / Full-Day Training
Cyber, Physical & Information Resilience Assessment	Examines how cyber, physical, information, insider, and external threats can converge to affect manufacturing operations and continuity.	Contracted Project
Executive Geopolitical & Manufacturing Intelligence	Provides leadership with concise intelligence on geopolitical, supply-chain, security, trade, and infrastructure developments—and what they mean for the organization.	Monthly Retainer
Executive Risk & Resilience Exercises	Tests leadership decisions against realistic supply disruption, cyber, infrastructure, geopolitical, insider-threat, and convergent-risk scenarios.	Half-Day / Full-Day Exercise
Fractional Intelligence, Supply Chain & Risk Support	Provides access to specialized geopolitical, intelligence, supply-chain, and risk expertise without requiring the organization to build and maintain the capability internally.	Monthly Retainer / Contracted Support
Geopolitically-Advised Supply Chain Risk Management	Integrates geopolitical, trade, security, economic, and regulatory developments into supply-chain risk decisions.	Contracted Project / Monthly Support
ICS/OT Intelligence & Threat Support	Provides intelligence-led assessment of threats, dependencies, and changing external conditions relevant to industrial control and operational technology environments.	Contracted Project / Ongoing Support
Intelligence-Driven Risk & Resilience Training	Builds practical capability to integrate intelligence and changing conditions into cyber, information, physical, supply-chain, and enterprise risk management.	Half-Day / Full-Day Training
Manufacturing Crisis Decision Support	Provides rapid intelligence and analysis during geopolitical, supply-chain, infrastructure, cyber, or security disruptions affecting operations.	On-Demand / Retainer
Supplier & Alternative Sourcing Risk Assessment	Evaluates current or prospective suppliers for geopolitical, infrastructure, security, operational, and supply-chain exposure.	Contracted Project
Supply Chain Intelligence — and How to Use It	Teaches teams how to identify, assess, and operationalize supply-chain intelligence to improve sourcing, risk, and operational decisions.	Half-Day / Full-Day Training
Supply Chain Mapping & Resilience Assessment	Maps critical suppliers, Tier 2/3 dependencies, geographic concentrations, transportation nodes, and vulnerabilities that could disrupt production.	Contracted Project
Tailored Intelligence Monitoring & Warning	Monitors organization-specific suppliers, materials, regions, threats, and indicators to provide early warning of developments that may affect operations.	Daily / Monthly Subscription
