Direct Support to Project and Change Management

We use the Project Management Institute (PMI) Standard for processes and Prosci's Change Management formula for supporting change.

Our focus is process optimization to enhance risk management through analytics, information management, intelligence for decision making, cyber and technical resource management, geopolitical understanding, and money transfer systems.

We can provide:

- Consultation for process optimization with recommendations for implementation aligned with Prosci's Change Management practices and Project Management Institute's standards.
- Training for your personnel in how to apply and understand considerations regarding current trends in threat finance, cyber, security, or geopolitical considerations.
- Consultation/Mentorship for your leaders in current geopolitical trends and implications of these trends for your business.
- Consultation and direct support, as needed, to roll up our sleeves and work with you to refine your processes and systems.
- Consultation, training, and direct support in AI Governance and financial compliance.
