

# 2057 AND 2057 LED

## Nautical Oval

The 2057 Nautical Oval fixture is a close cousin to the 2059 Nautical Round fixture in character; appropriate for decks and docks because of its construction of modern plastics, ensuring long life of the product. The back plate and lens are composed of tough polycarbonate, and the eyelid or grill of durable polypropylene. This fixture can be ordered with a Florescent or LED light source. Either way, this is a solid product with great economy of operation. The Nautical Oval is available in black or white and can be set up with a grill or eyelid, or neither for a more simplistic look.

**Proudly manufactured in the USA**
