5 subs in for 9, so 9 is slashed. Slashes are used when a player *subs in* for another player.

7 is replaced by L1. L1 is replaced by L2. L2 is replaced by L1. L1 is replaced by L7.
 Liberos can *replace* each other once or multiple times.
 The original player is the only player, other than the other libero, who can *replace* the libero(s).

NOTE:

*Slashes are used when a player subs in for a player.

*Liberos replace players, they do not sub in for them, so slashes are NOT used.
