

SPOTTED LANTERNFLY IDENTIFICATION

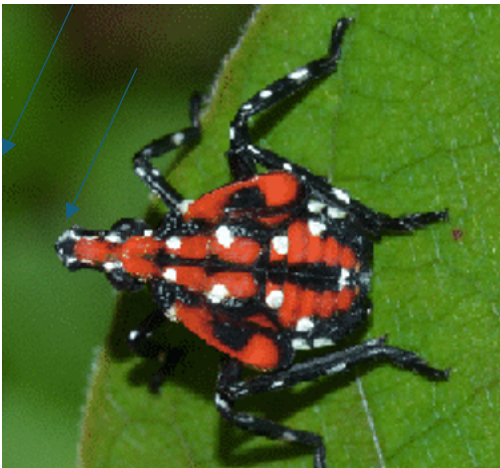

Right after they are born: May

Eggs: October to April:

Before they molt and get wings: June- July

After they get wings: July - October

If you see them:

1. Smush nymphs & winged bugs. It's easier to step on them if you approach from the front, not back.
2. Scrape eggs into a plastic bag or jar (using putty knife or credit card); add hand sanitizer or alcohol & throw away. Do NOT compost.

Check shed walls, patio furniture & tree trunks for eggs.
