Comments: breath dumps much better, there are still a couple early on, but as you get further in, they seem to disappear. Make sure you are 100% in, *before* the text begins. The objective seems to have changed a little. This seems more about your celebration of your discovery and less about indicting Treat. There are still a couple of moments of “indictment”, particularly the last line. but this seems generally more truthful and connected than before .

Great working with you this semester. I am looking forward to working with you over the next few years
