Intellectual Force Fields Testimonial

From the desk of Benji Falloway

Ken,
I apologize for the delay in getting this testimony to you regarding my experience with your chair and ottoman. It's been a busy time after vacation and still trying to catch up.

I had the opportunity and privilege to use the chair and ottoman provided by Mr. Cartier. I was curious to see if the chair would have any positive results in regards to a recent Achilles injury I sustained. I seemed to notice some improvement within the first few days of using the chair. I had lessened swelling and inflammation after the first week and better range of motion with my ankle. The pain that I was dealing with also seemed to decrease the more time I spent using the chair. I used the chair and ottoman for a total of 3 weeks and had substantial benefits in regards to my injury with minimal negative side effects. The only side effect that I experienced was a slight headache on about day 3 of using the chair. This only lasted for approximately an hour and could easily have been separate and unrelated. I would use the chair for a minimum of 45mins - 1hr on most days. My personal use of the chair was a positive experience with benefits in regards to my Achilles injury. I want to personally thank Mr. Cartier for allowing me to use his chair & ottoman.

Sincerely,
Benji Falloway
