Animal & Nature Products

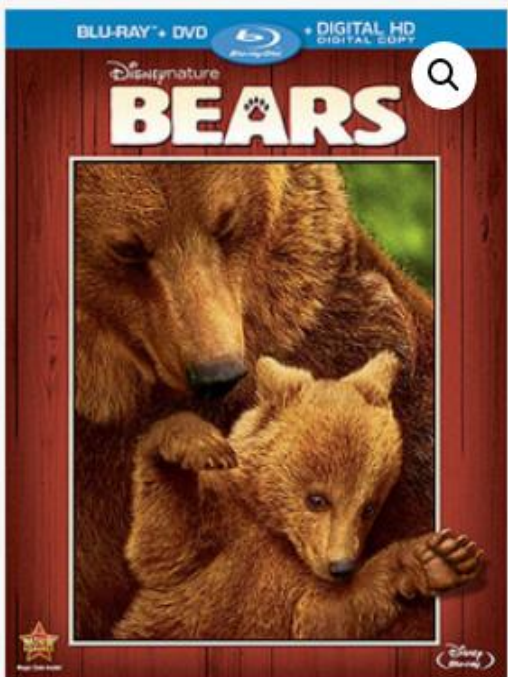

Product Description – Dinosaur 13

When Paleontologist Peter Larson and his team from the Black Hills Institute made the world's greatest dinosaur discovery in 1990, they knew it was the find of a lifetime: the largest, most complete Tyrannosaurus Rex ever found. But during a ten-year battle with the U.S. government, powerful museums, Native American tribes and competing paleontologists, they found themselves not only fighting to keep their dinosaur but fighting for their freedom as well.

Product Description –

Business of a Sports Car Complete Series

From conception and design, to testing, production and display, Business of a Sports Car will reveal the technological mysteries and challenges in the development of a superior automobile. This series takes an inside look at every stage of a concept car from a renowned international automobile maker. For the first time ever, cameras go behind the scenes and discover the process of creating BMW's 6-series sports coupe.

Design & Vision

Years before the first piece of metal is cut, before the first bolt is screwed on, a new car has to be designed. BMW holds a bruising internal competition that pits its best designers against one another. Who can come up with the most creative look for the interior and the exterior of the car? See who wins as each design goes through the tough test of BMW's engineers.

Development & Testing

Once the design is frozen, the testing begins. Follow models of the new car as they are sent around the world to have their performance pushed. See engineering at its finest as the world's best transform design into superior function.

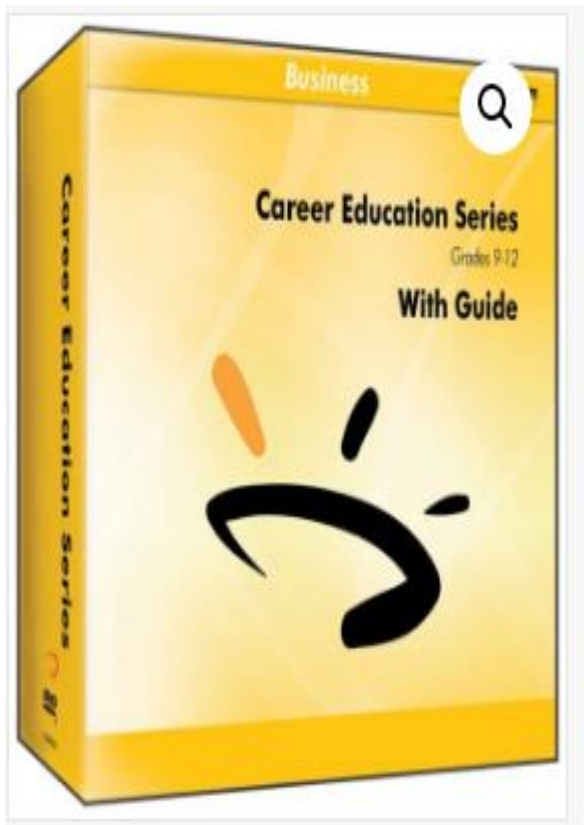

Production & Marketing

With all the test results in, BMW begins making the new sports car at its massive factory in the tiny town of Dingolfing Germany. The enormous robots that will build the car have to be taught the moves that will help the company produce a car every 12 hours. Each car has some 5,000 individual welds. While the factory creates the product, BMW and its marketing team work on building advertising and publicity to build a commanding presence for the epic 6-series. Follow the new car as it makes its way from the production line to its ultimate unveiling at the North American Auto show in Detroit.

There's never been a series quite like this.

Product Description – Future of Work

This three-part series explores monumental changes in the workplace and the long-term impact on workers, employers, educators and communities. Employment is part of the American Dream. Will the future provide opportunities for jobs that sustain families and the nation?

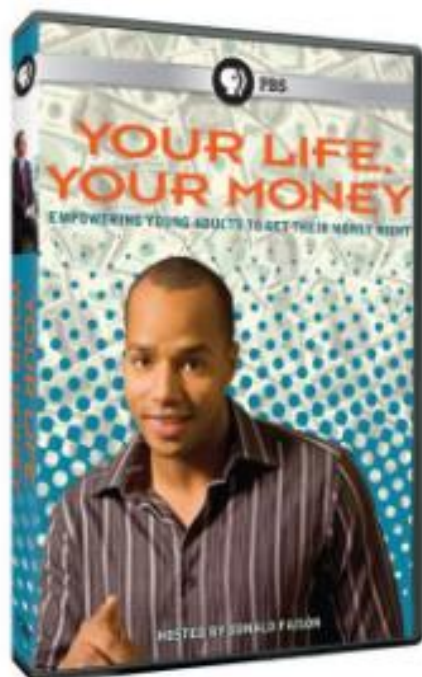

Episode 1: What is Changing Work? This episode illuminates disruptions to the world of work—AI, robotics, globalization and labor practices. The COVID-19 pandemic was a new driver of change; at the pandemic's height, unemployment flipped from its lowest rate in 50 years to its highest level in a century.

Episode 2: Futureproof How can we predict job growth, training needs and the role of education in order to prepare for the work of the future? What are the challenges and consequences of the pandemic, and of America's racial and economic disparities?

Episode 3: How is Work Changing Us? Do businesses need offices? Is a 9-to-5 workday valid? Does the nation need a drastic rethinking of the social safety nets? Does America face a "post-work" era, or will there be increased inequities in how we make our livings?

Product Description – Food Science Complete Series

It's in the cereal you have for breakfast, in the pizza you have for lunch, in the soda you have for dinner. "It" is science, of course. Everything you eat is the result of a chemical process, either man-made or initiated by good old Mother Nature. In Food Science, you'll see where it's made, how it's made and what it does when it gets into your body. Award-winning chemist Dr. Joe Schwarcz guides viewers through the history, the culture and the science of the fuel of life. Viewers will gain a new respect for what is on the plate and will allow them to make smarter decisions in their daily diet.

This 13 program series tells the stories and unravels the science behind of our daily bread. The series explains what we're eating, how it's made, and even what effect different combinations of foods will have on our bodies. For example, who knew eating coleslaw and drinking orange juice with a smoke meat sandwich will negate some of the unhealthy properties of the meat? By showing how food is made, and what food is made of, viewers can gain a new respect for what is on the plate and will allow them to make smarter decisions about what include in their daily diet.

Teaching Systems- Physics Super Pack

Cerebellum is pleased to offer teachers and homeschoolers the complete Teaching System for Physics. The award-winning Teaching System is designed to capture your students' attention and make your presentation of the critical concepts of Physics come alive! Physics is one of the three basic natural sciences. It's considered one of the most fun topics but can intimidate both teachers and students. By concentrating on the key concepts and presenting the material in an intriguing manner, Physics students are able to gain confidence in themselves and their ability to master this important science. Teachers can present the topic with a minimum of self-study and in fact can learn with the student if necessary. Home-school instructors lacking a natural science background can feel confident in the accuracy and thoroughness of the Teaching Systems Physics materials. Likewise, home-schooled students, who might not have access to the Physics laboratory, can benefit from a visual learning experience beyond the textbook.

SKU: **GH3813**

Price \$450 USD

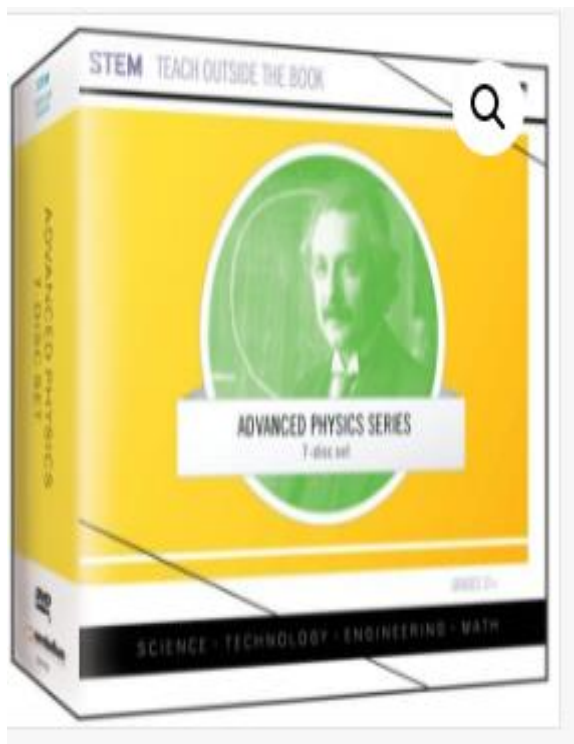

Product Description – **Physics Facts Super Pack**

Physics can be used to explain almost everything in our universe, including light, energy, force, motion, and more. Learn about the basic principles of physics in this 8 part series. Beginning with the basic principles of physics, this program will delve into deeper topics including nuclear energy, electricity, kinematics, and more!

Just the Facts: Physics Facts examines the basics of physics, covering from motion, forces, energy, and more. Beginning with the basics of force and energy, and covering the famous theories of Einstein and Newton, this collection presents a comprehensive overview the main principles of physics. Concepts are illustrated with live footage, video clips, and animated graphics. Each video is divided into sections to explore specific themes, and concludes with a summary of key points. The award-winning Just the Facts series will intrigue and inform, using language that is easily understandable.

Human Evolution Complete Series

Beginning in the late nineteenth century and throughout the twentieth century, geologists, archaeologists and paleoanthro-pologists have given the world evidence of the physical and cultural development of humans. Amazing discoveries continue into the twenty-first century, broadening our knowledge of our earliest ancestors and pushing the date of the first appearance of humans to millions of years before recorded history.

Inventions that Change Our Lives Complete Series

Inventions and Innovations feature rare footage of pioneering inventors Thomas Edison, Alexander Graham Bell and Henry Ford. Spend time with these remarkable men who were not afraid to ask, "Why?" Learn how these inventors turned their theories into tangible proofs. In doing so, they changed forever the way we work and play everyday of our lives. Inventions and Innovations explains how the atom is the basic building block for inventions that attempt to conquer the skies, explore the ocean depths and unlock the limitless opportunities of computers and the Internet industry.

Product Description – NanoTechnology

The main program is presented in the following clear-cut sections: What is nanotechnology?; Units: micrometer and nanometer; Special properties of nanoparticles; The Gecko Effect; Carbon Nanotubes; Surface energy; Hydrophilic and hydrophobic surfaces; the Lotus effect; Use of lasers in nanotechnology; Issues raised by nanotechnology. Because nanotechnology works with the metric unit nanometer and micrometer, this program uses metric units. However, this should not affect a student's understanding of the concepts presented in the program.

Product Description – Nuclear Energy Series

Nuclear power produces almost a fifth of the world's electricity. Supporters say it's safe, cheap and – best of all – the answer to global warming. Critics say it's not safe, or cheap. And it won't really help with the global warming problem.

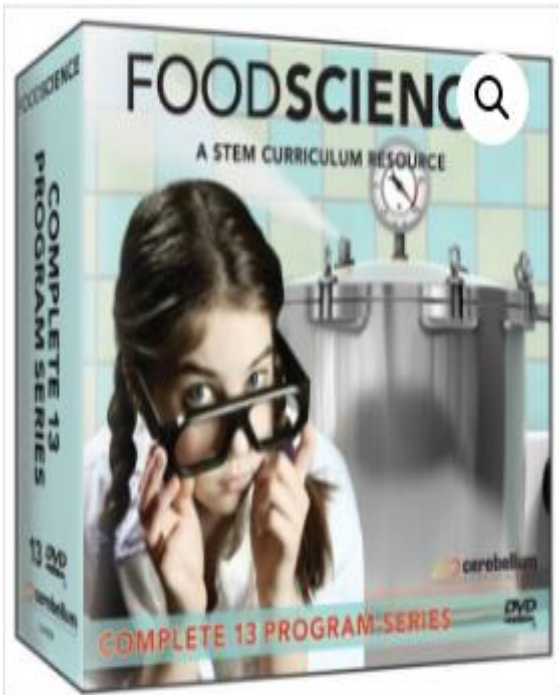

So who's right?

Nuclear Energy: The Issues presents the arguments for and against, with relevant background information.

The science behind nuclear power – what nuclear fission is, how a nuclear power station works and the 'nuclear fuel cycle' – is explained in more detail in Nuclear Energy: The Science.

Product Description – Science of Food Complete Series

It's in the cereal you have for breakfast, in the pizza you have for lunch, in the soda you have for dinner. "It" is science, of course. Everything you eat is the result of a chemical process, either man-made or initiated by good old Mother Nature. In Food Science, you'll see where it's made, how it's made and what it does when it gets into your body. Award-winning chemist Dr. Joe Schwarcz guides viewers through the history, the culture and the science of the fuel of life. Viewers will gain a new respect for what is on the plate and will allow them to make smarter decisions in their daily diet.

This 13 program series tells the stories and unravels the science behind of our daily bread. The series explains what we're eating, how it's made, and even what effect different combinations of foods will have on our bodies. For example, who knew eating coleslaw and drinking orange juice with a smoke meat sandwich will negate some of the unhealthy properties of the meat? By showing how food is made, and what food is made of, viewers can gain a new respect for what is on the plate and will allow them to make smarter decisions about what include in their daily diet.
