Product Description – Disney Nature Complete Series

Blu-Ray/DVD/Digital HD. In an epic story of breathtaking scale, Disney Nature's upcoming True Life Adventure "Bears" showcases a year in the life of a bear family as two impressionable young cubs are taught life's most important lessons. Set against a majestic Alaskan backdrop teeming with life, their journey begins as winter comes to an end and the bears emerge from hibernation to face the bitter cold. The world outside is exciting but risky as the cubs' playful descent down the mountain carries with it a looming threat of avalanches. As the season changes from spring to summer, the brown bears must work hard to find food ultimately feasting at a plentiful salmon run while staying safe from rival male bears and predators, including an ever-present wolf pack. "Bears" captures the fast-moving action and suspense of life in one of the planet's last great wildernesses Alaska!

Product Description –

Digital Safety and Awareness Complete Series

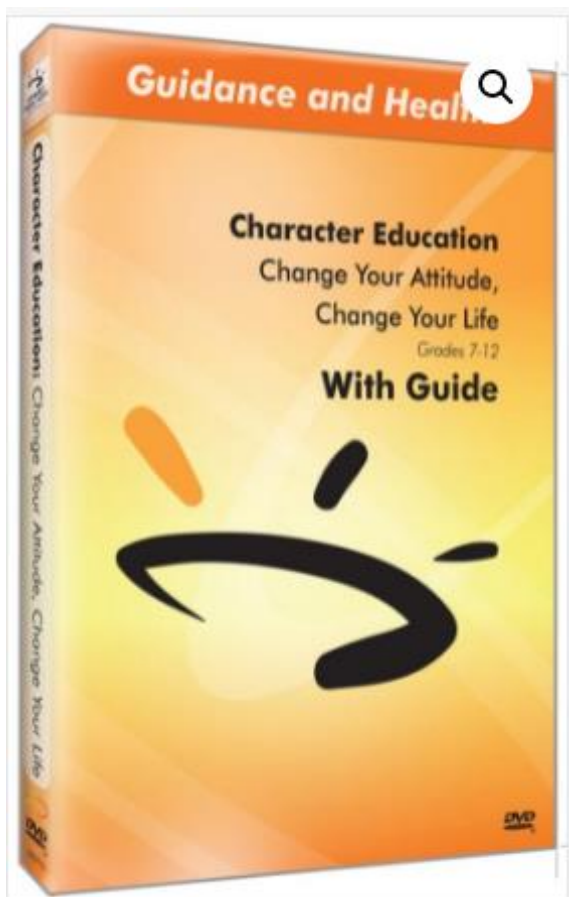

The innovation and evolution of digital technologies has created a new way of teaching, learning, socializing, and communicating. The adoption of new digital technology is so rapid that a uniform and proactive concept of responsible use is often overlooked. With these constant changes, the irresponsible, and often dangerous and malicious use of these digital devices can lead to negative, life-altering consequences. The Institute for Responsible Online and Cell-Phone Communication's (IROC) founder Richard Guerry's approach is solution-oriented and preventive. In the digital world, your actions are "public and permanent."

Working with IROC, Mazzarella Media has produced a series of programs that provides digital users, young and old, with the information they need to make good digital decisions. Awareness greatly reduces the risk of becoming a victim of a cyber-crime or digital exploitation.

There are separate age-appropriate programs and guides for grades 3-5, 6-8, and 9 College. Each program is divided into several 7-10 minute chapters. This program also aims to inform students in the importance of being aware of their digital behaviors. In addition, it provides tools, tips, and comprehensive curriculum to increase everyone's digital awareness and consciousness.

Astronomy Essentials Complete Series

“HOW DO TELESCOPES WORK?”

In this program, you'll learn about the history of the telescope, the modern day telescope, and how telescopes work. Topics include: Refracting telescopes, large telescopes, the job of modern-day telescopes, the Milky Way, black holes, and the beginning of the Universe.

THE SOLAR SYSTEM

The Solar System is approximately 5,000 million year old, but how did it begin? This program covers the basic theories of origins of the Solar System. Topics include: planets of the Solar System, satellites, future of the Solar System, evolution of the sun, mass of the Solar System, and other galaxies.

THE SUN: SOURCE OF ENERGY AND LIFE

The Sun is one of the thousands of stars found in our galaxy. In this program, you'll learn about the physical characteristics of the Sun: size, distance, mass, temperature. We will also cover helium atoms, nuclear fusion, the ocean, the Sun as a source of energy, and more!

WHAT ARE COMETS?

In ancient days, comets were considered to be harbingers of ill-fortune. Today, comets provide possible answers about the origins of our Solar System. In this program, you'll learn about the composition of comets, their structure, and their behavior patterns in the Solar System. We'll also discuss the orbits of comets, their origins, evolution, and one of the most famous comets of all: Halley's Comet.

WHAT ARE STARS?

The Milky way is made up of approximately 15,000 million stars. What are stars, and how are they formed? This program will discuss that and more, including our most famous star, the Sun. We'll also learn about the planets: Mercury, Venus, Earth, Mars, Jupiter, Saturn, Uranus, Neptune and Pluto.”

Product Description – Nova- Wonders

NOVA: Wonders, Season 1 NOVA Wonders is a fresh, lively series that makes complicated concepts accessible while taking a deep dive into the scientific process. Each episode poses a single big scientific question and takes viewers along on a journey to explore how far we've come in our quest for answers, and how we've managed to get here. Among the intriguing topics pondered are the secret language of animals, what's hidden in the human body, the artificial intelligence technologies that could rival and surpass the abilities of the human mind, the controversial power to engineer life in a lab, and the mysteries of the universe. The series travels to some unexpected places to look for answers -including deep underwater, where humpback whales are essentially playing a game of "telephone" across the world, with pods teaching each other new songs; deep beneath our skin, where trillions of microbes are living in our bodies; deep below the earth, in mines where researchers are trying to detect elusive dark matter particles; deep into space, where astrophysicists are hunting for signs of extra-terrestrial life, and more.

Science of Food –Complete Series

It's in the cereal you have for breakfast, in the pizza you have for lunch, in the soda you have for dinner. "It" is science, of course. Everything you eat is the result of a chemical process, either man-made or initiated by good old Mother Nature. In Food Science, you'll see where it's made, how it's made and what it does when it gets into your body. Award-winning chemist Dr. Joe Schwarcz guides viewers through the history, the culture and the science of the fuel of life. Viewers will gain a new respect for what is on the plate and will allow them to make smarter decisions in their daily diet.

This 13 program series tells the stories and unravels the science behind of our daily bread. The series explains what we're eating, how it's made, and even what effect different combinations of foods will have on our bodies. For example, who knew eating coleslaw and drinking orange juice with a smoke meat sandwich will negate some of the unhealthy properties of the meat? By showing how food is made, and what food is made of, viewers can gain a new respect for what is on the plate and will allow them to make smarter decisions about what include in their daily diet.

The Human Body Complete Series

Just the Facts: The Human Body

The Musculoskeletal System — This first part of The Human Body series examines the structure of our skeleton and the function of our muscles. Viewers learn how our bones provide the rigid support necessary to hold any position, while our joints give us the remarkable range of motion needed to run, dance, climb, or simply to walk, sit and bend. In addition, we discover how our muscles and associated tendons and ligaments are constructed to allow them to change shape functions, as well as how bone growth occurs. This video also takes viewers on a tour of the most wondrous part of the skeleton, the skull, seemingly a solid bone with teeth, but actually far more than that.

The Nervous System — offers fascinating insight into how our brain sets us apart from all other vertebrates. It gives us the ability to speak, reason, remember and engage in complex thought, as well as the capacity to feel compassion, sadness, anger, joy and love.

Major Systems and Organs — The human body is a wondrously complex machine made of flesh, bone, muscles, organs, blood vessels and highly specialized systems that function together to sustain life. This fascinating third part of The Human Body series examines the incredible “machine,” from simple cells, to DNA, the body’s building blocks of life, to the major systems and organs.

The Just the Facts Learning Series brings you the finest in educational programming and features fast-paced format that makes learning fun.
