## Call-In Dictation System and Tip Hotline

You can purchase or lease our DigiTel - Crime Stopper System.

1. Simply connect our DigiTel Pod to your pc's USB Port and to your analog phone line(s), install the DigiTel Software, and choose a PIN for each user.
2. Each officer's dictation files and citizen's hotline tips go to our DigiScribe transcription software for transcription or to the designated officer's phone.
3. To dictate, call the phone number connected to your DigiTel, log-in with your PIN, and control your session using your phone's touch-tones. To capture hotline tips, no PIN number is required and recording is automatic.
4. DigiTel supports 1 to 32 users calling in at once. Purchase the line capacity you need today, with the flexibility to add more line capacity tomorrow.
5. The DigiAlert option can alert your transcriptionist to new work and your officer to a new tip, and the ReportGenie option can create custom dictation history and tip reports for you.
6. Our DigiScribe Transcription Kit is the perfect companion for your DigiTel.

**Tiny, yet powerful!** Just 6" x 4" x 1"
