

South Seas Club Update: 11/3/2022

- Electric was restored to all properties this past week.
- First responders have been making great progress with removing excess sand in and around properties while conducting elevator inspections and removing the water-penetrated drywall.
- Furnishings are being assessed due to the amount of time it's stayed in an uncontrolled environment.
- Any debris that was restricting access to the properties has been removed, and our landscaper is inspecting the palm trees.
- All roofs are tarped, and units are prepared for work to begin.
