Additional Information for Consideration: please share any additional information you feel would be helpful for consideration.

Stud Owner Initials _____ Date _____

Female Owner Initials _____ Date _____

Agreement: Female must be approved by Stud Owner

1. Female is healthy and all genetic and/or health problems which exist (or have existed) in Female must be disclosed to Stud Owner.
2. Female must be of sound temperament, appropriate for the French Bulldog breed.
3. Female Owner must provide Stud Owner with a copy of Female's Pedigree to examine. Registration with full rights required.
4. Female Owner warrants that this Female has not been exposed to any other Stud Dog from the start of her heat cycle.
5. Female Owner agrees to keep Female properly confined following the breeding to ensure no other dog could mate her before mating season is finished.
6. That all puppies born from this mating, if sold, will be sold by Female Owner to private parties.
7. No puppies may be sold to any person who deals with the resale of dogs - no puppy brokers. No puppies will be sold, leased, or given to anyone or to any pet shop, commercial kennel, puppy mill, breeding facility, shelter, or research facility.
8. All puppies will be sold to families or small in-home breeders. No puppies will be sold to "kennels" where dogs are kept in outdoor facilities.
9. Male puppies sold with full rights must not be bred prior to one year of age.

Guarantees by Stud Owner

1. Stud Owner guarantees a live birth of three puppies. This means that three puppies are born breathing. This does not guarantee that they will live to any particular age.
2. Three live puppies constitute a litter. If three live puppies are not born, a repeat breeding will be offered on the same Female only.
3. For the three live puppy guarantee to be in place certain provisions must be followed by Female Owner: a. If semen is shipped, progesterone testing must be completed either at home or at a reproductive clinic. b. Birth by caesarean section or as recommended by veterinarian. If Female Owner does not follow vet's advice and puppies pass away during at home birth then the three puppy guarantee no longer applies and no rebreed.
4. If Female does not produce a pregnancy on the first heat cycle a rebreeding will be offered. Shipping & Collection fees still apply. a. If Female does not produce a pregnancy on the second heat cycle, Stud Owner can opt to transfer the breeding to another Female. However, if Female Owner wishes to transfer a service to another Female it must be requested in writing and other Female must be approved by Stud Owner. b. If no stud fee was paid and stud fee was to be paid by allowing a puppy back, then the breeding is NOT allowed to be transferred to another Female without approval of new Female by Stud Owner.

Additional Provisions

Stud Owner Initials _____ Date _____

Female Owner Initials Date

5. If Female Owner sells Female this contract and Stud Service does not transfer with Female. The contract and Stud Service is then void. Female Owner can choose to transfer Stud Service to another Female they own IF Female that has been sold has not achieved pregnancy. This transfer can only be done in writing by contacting Stud Owner with prior approval.
6. NO refunds or partial refunds for Female not becoming pregnant, Female being sold, Female not having a large enough litter, etc.
7. If for any reason Stud should die or become sick/injured prior to Stud Service taking place and no frozen semen is available, Stud Fee will be refunded in full within 3 months.

Guarantees by Female Owner

1. It is preferred that Female is already tested for JHC/DM/HUU/CMR1 and be negative for all four.
2. Litter registration will be initiated by (6) six weeks of age so the puppies can go to their new homes with registration certificates once they have been fully evaluated by Stud Owner. Full payment must be received, or litter registration will be held.
3. Stud Owner agrees that all puppies may be sold on full registration or limited per Female Owner's discretion.
4. Female Owner agrees to properly vet all homes - this can include requiring photographs and/or video of the new owners' property or having them fill out a new puppy questionnaire which Stud Owner can provide.
5. Female Owner agrees to take back any puppy resulting from this breeding at any time during said puppy's lifetime so that it may never end up in a shelter.
6. Female Owner agrees that Female will NOT change ownership while she is in whelp and that the puppies will be born and raised at home of Female Owner.
7. Female Owner will furnish pedigree, health certificates, and photos of Female to Stud Owner.
8. Female must be progesterone tested to ensure the best timing for accurate artificial insemination to ensure the three live pup guarantee. A negative brucellosis test is required for rebreed.
9. Collection and overnight shipping fee will be paid for by Female Owner. Stud Owner will provide the shipping container and the semen extender which is paid for by Female Owner. Stud Owner will provide up to 2 shipments per breeding. Each requested shipment and shipping is to be paid by Female Owner. Additional collections possible if no other scheduling conflict.
10. **For rebreeds, Female Owner is responsible for the cost of semen extender in addition to the shipping fees.**
