

The Math at a Glance:

Comparison Chart Table

Traditional vs. The Stewardship Exit Strategy

Feature	Traditional Mortgage Protection	The Stewardship Exit Strategy
Primary Goal	Death Benefit ONLY	Death Benefit + Asset Value
End of Term	Policy expires: \$0 return	Policy can be sold for cash
Ownership	"Renting" coverage	Building policy equity
Flexibility	Fixed for the life of the loan	Convertible to fit your life
Exit Strategy	None (Cancel or let lapse)	Life Settlement payout
Outcome	Sunk cost of premiums	Potential for a "Profit" on premiums

Here's the bottom line, with the **Stewardship Exit Strategy**:

- You're not just paying for protection, you're **building equity**
- You're not locked into a single outcome, you're gaining **flexibility**
- You're not renting coverage, you're creating a **future asset**
- You're not stuck with a policy that ends at \$0, you have a **strategic exit**

This is what stewardship looks like:

making sure every dollar you spend works for you, not just the insurance company.
