

## SENIORS

**Prime** keeps your home safe & in tip top shape so you can live on your own as long as possible! Our 13 Point Core Safety & Preventative Checklist is performed first thing every visit. This allows us to keep you safe and catch any minor issues before they become big problems.

Just because you may not be as physically able to do as much as you used to, shouldn't mean you have to move out of the comfort of your own home and spend big bucks.

## THE "BUSY" HOMEOWNER

If "Life Happens" describes you and why your home or property gets put on the back burner, then prime is the company for you! Spend your spare time with your family or doing what you enjoy most and let prime handle the routine things from now on.

Some of our "Busy" homeowners sign up their relatives so they themselves can feel confident that their family members are living in a safe and secure environment. This allows them to spend their visits enjoying quality time together rather than doing chores.

## THE NEW HOMEOWNER

Homes don't come with a To-Do Manual. So it's no surprise that a lot of our "New Homeowner" customers aren't always aware of the routine upkeep needed to maintain a home properly. Some others simply don't enjoy, or have the desire to work around the house or property. If this is you or someone you know, **Prime** will make sure your home and property are always taken care of while you experience all that life has to offer.
