# TRAINER PROFILE

**Fantasia Soetan**

## **Trainer | Data Analyst | Project Manager**

Fantasia Soetan is a data-driven project manager and business analyst with over a decade of experience designing and delivering insight-led solutions across infrastructure, education, nonprofit, and consulting sectors. She specialises in helping professionals and organisations harness data for strategic decision-making and operational impact.

Through her workshops and training programmes, Fantasia empowers learners to apply data tools and project techniques in real-world contexts—bridging the gap between theory and business results. Her engaging style combines storytelling, case scenarios, and hands-on problem-solving to drive learning retention and confidence.

## **Areas of Expertise**

- Data Analysis & Visualisation (Excel, Power BI, SQL)
- Workflow & Process Automation (Power Automate, SharePoint)
- Project Planning & Delivery (Waterfall, Agile, Hybrid)
- Operational Performance & Reporting
- Stakeholder Communication & Change Management

## **Experience Highlights**

- Led major systems improvement and workflow automation projects for Network Rail
- Built and deployed Power Platform solutions to streamline multi-stage approvals and performance monitoring
- Developed training content and dashboards for analysts, planners, and team leads in high-risk industries
- Mentored career changers and junior staff in building technical fluency and business awareness

## **Certifications & Tools**

- PRINCE2 Practitioner – Project Management
- Microsoft Certified: Data Analyst Associate (DA-100)
- Power BI, Power Apps, Power Automate, SharePoint Lists
- Advanced Excel (Power Query, PivotTables, Dashboards)
- Fundamentals of Agile & Digital Transformation

## **Training Approach**

Fantasia's training philosophy is rooted in clarity, relevance, and transformation.

"I believe learning should be practical, focused, and connected to real problems. Every module I deliver is designed to help you do something better tomorrow than you could today."

Her course design focuses on use-case driven delivery, interactive tasks, and takeaway tools that participants can use immediately in their work.
