# REYNAERS HANDLES

windows, doors, sliding doors, folding doors and lift  
& slide doors

Reynaers  
Aluminium

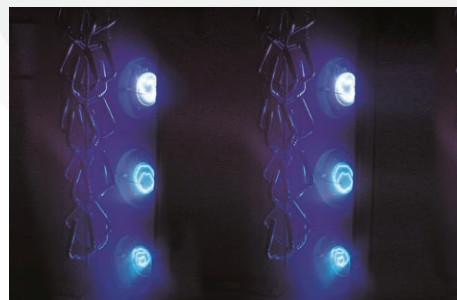

# 1. PURITY®

## **TECHNICAL PRECISION AND ITALIAN DESIGN**

Purity handles were created for those who are looking for best design and best quality. Designer Leo De Carlo created sophisticated and minimalist shape, but Purity handles are unique also because of use of new generation materials, advanced mechanical specifications and simple, ingenious way of mounting.

## MATERIALS

**PuRity** handles are made of **PURA** material, which is whole recyclable, does not corrode and is hypoallergenic. Unique process of trimming the **BIOV** (Bioecologic Ion Overlay) overlay depends on vacuum deposition of metallic ion from volatile phase. Because of that handles are unusually durable and can be used also in aggressive environments, optionally they can have **antibacterial** properties. Conjugation of main material and overlay trimming makes **PuRity** handles eligible for sustainable environment.

## DESIGN

Minimalistic design of **PuRity** handles is based on expressive flat surfaces and polished details. Timeless solution of the best quality.

## MOUNTING

**PuRity** handles have also special, unique, new generation way of mounting. **Cliq-Clag mechanism** causes that handle slams in correct place after putting shank into doors or windows.

## 2. CONTOUR

### **SAFETY IN MODERN STYLE**

Contour is new line of solid handles made of stainless steel in modern design. Contour handles meet requirements connected to resistance, durability and safety. They are compatible with most types of opening and most of Reynaers Aluminium systems.

including SlimLine 38, MasterLine 8 and 10, CP 130, CP 155 and MasterPatio.

## MATERIAL

**Contour** handles are made of **stainless steel** which is durable, hygienic and very resistant to corrosion material. Use of steel provides to better safety from burglary, but also makes that handles are easier in maintenance and resistant to cleaning supplies. These advantages causes that Contour handles are great choice for f.ex. hospitals. And because steel is material which can be recycled Contour handles fit also in concept of **sustainable building**.

## DESIGN

Determined, straight lines are contrasted with soft rounded handle sections. Efficient, practical design adapted to modern style.

## SAFETY

**Contour** handles improve safety in our homes. Most of models have **SKG\*\*** or even **SKG\*\*\*** certificate and are suitable for Reynaers Aluminium systems of anti-burglary RC2 class which means that they highly secure from burglary.

## COLOR SCHEME

Contour handles are available only in color of **stainless steel**.

## 3. TOUCH

### UNIVERSAL ELEGANCE

Touch is considered, aesthetic solution which can work well in connection with every architectonic style. Form and functionality are tailored to modern life needs.

## MATERIAL & FINNISH

**Touch** handles are made of **high quality aluminium alloy**. Also importantly is fact, that they are available with **antibacterial overlay** which protects from bacteria, fungi and viruses spreading.

**Antibacterial overlay** is integral element of anodized or varnished surface, so it is highly durable.

## DESIGN

Form of **Touch** line is based on lengthen lines of smooth plates and elegant handles. Ideal design for modern houses, stylish contrast for renovations. **Touch** handles are suitable even for internal wooden doors which guarantees consistent aesthetics in whole house.

## SAFETY

Anti-burglary and flush-pull **Touch** handles have certificates which confirm their **burglary resistance**. Long, made of hard aluminium plate makes lock access and its damage practically impossible.

## 4.HORIZON

### **MODERN STYLE AND FUNCTIONALITY**

Perfect, optimal solution for everyone who builds new house or makes renovation.

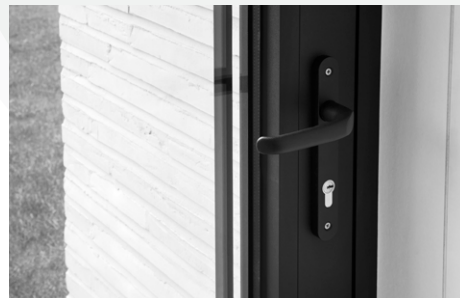

Horizon handles can be easily adapted to any architectonic style and type of opening.

## MATERIAL

**Horizon** handles are made of molded or pressed aluminium.

As additional security there is **antibacterial overlay** available. It can be connected with powder coated as well as anodized overlay. Antibacterial overlay efficiently lowers the danger from pathogens spreading.

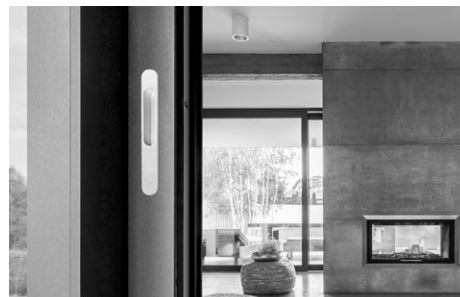

## DESIGN

Shape created with emphasis on the comfort, with characteristic, distinguishing cut on handle. Ideal, ergonomic form.

## MONTAGE

**Horizon** line has been used with Reynaers Aluminium systems for years. By that this handles line is adapted to every type of opening, regardless if it is window of standard opening or anti-panic door.

## COLOUR SCHEME

**Horizon** handles can be anodized or powder coated in one of above 400 RAL colours.

A close-up photograph of a modern window handle and frame. The handle is a sleek, silver-colored metal with a curved, ergonomic design. It is mounted on a matching silver-colored frame. The background is a blurred view of a window with multiple panes, showing a bright blue sky and some greenery. A semi-transparent blue rectangular overlay is positioned in the upper right corner of the image, containing the text '5.OLIMPO' in white.

## 5.OLIMPO

### **USER-FRIENDLY DESIGN**

Olimpo line is based on modern, adapted to contemporary requirements design.

## MATERIAL

**Olimpo** handles are combination of high quality technical solutions with great materials. They are available in powder coated, anodized and PVD variant.

Handles are available in easy montage variant, so that there is no need to use special tools.

## DESIGN

Straight design of ergonomic **Olimpo** handles is suitable for sets with any type of trim.

## COLOUR SCHEME

**Olimpo** handles are available in every RAL chart colour, with texture and anodized. There is possibility to choose the same colour as window or door frame.
